THE CHEMICAL SOCIETY

Patron

Her Majesty the Queen

President

Sir Harry Melville, K.C.B., Ph.D., D.Sc., F.R.S.

Vice-Presidents
who have filled the office of President

H. J. Emeléus, C.B.E., M.A., D.Sc., F.R.S.
Sir Edmund Hirst, C.B.E., D.Sc., LL.D., F.R.S.
Sir Christopher Ingold, D.Sc., F.R.I.C., F.R.S.
Sir Ewart Jones, M.A., D.Sc., F.R.I.C., F.R.S.
J. Monteath Robertson, C.B.E., M.A., LL.D. F.R.S.
Lord Todd, M.A., D.Sc., F.R.S.

Vice-Presidents

C. E. H. Bawn, C.B.E., Ph.D., F.R.S.
A. W. Johnson, M.A., Ph.D., Sc.D., F.R.S.
E. A. Moelwyn-Hughes, D.Phil., D.Sc., Sc.D., F.R.I.C.
R. S. Nyholm, D.Sc., F.R.I.C., F.R.S.
R. A. Raphael, D.Sc., F.R.I.C., F.R.S.
K. W. Sykes, M.A., D.Phil.

Honorary Treasurer

J. W. Barrett, Ph.D., A.R.C.S., F.R.I.C.

Honorary Secretaries

C. Eaborn, Ph.D., D.Sc., F.R.I.C.
W. Klyne, M.A., D.Sc., F.R.I.C.
D. H. Whiffen, M.A., D.Phil., F.R.S.

Ordinary Members of Council

K. W. Bagnall, D.Sc., F.R.I.C.
R. J. S. Beer, M.A., D.Phil.
R. E. Bowman, Ph.D., D.Sc., A.R.I.C.
J. I. G. Cadogan, D.Sc., F.R.I.C., F.R.S.E.
N. B. Chapman, M.A., Ph.D., F.R.I.C.
P. C. Crofts, B.Sc., Ph.D.
D. W. J. Cruickshank, M.A., Sc.D.
P. B. D. de la Mare, Ph.D., D.Sc., F.R.I.C.
A. G. Evans, Ph.D., D.Sc., F.R.I.C.
N. N. Greenwood, Ph.D., Sc.D., F.R.I.C.
T. G. Halsall, M.A., M.Sc., Ph.D.
H. B. Henbest, Ph.D., D.Sc., F.R.I.C.
G. J. Hills, Ph.D., D.Sc., F.R.I.C.
J. Idris Jones, M.Sc., D.Sc., F.R.I.C.
A. S. Jones, B.Sc., Ph.D., D.Sc.
S. F. Mason, M.A., D.Phil.
W. D. Ollis, B.Sc., Ph.D., F.R.I.C.
J. S. Rowlinson, M.A., D.Phil., F.R.I.C.
H. N. Rydon, Ph.D., D.Sc., F.R.I.C.
A. F. Wells, M.A., Ph.D., Sc.D.

Ex Officio

F. Hartley, Ph.D., F.P.S., F.R.I.C. (Chairman of the Chemical Council)
B. C. L. Weedon, Ph.D., D.Sc., F.R.I.C. (Chairman of the Joint Library Committee)
Sir Ewart Jones, M.A., D.Sc., F.R.I.C., F.R.S. (Chairman of the Publications Board)

General Secretary

J. R. Ruck Keene, M.B.E., T.D., M.A.

Librarian

R. G. Griffin, F.L.A.

Editor

L. C. Cross, T.D., Ph.D., A.R.C.S., F.R.I.C.

INDEX OF AUTHORS, 1966

A

Abbas, S. A., and **Hickinbottom,** W. J. Molecular rearrangements. Part VII. *NN*-Diacylanilines, 1305.

Abbott, D., **Bourne,** E. J., and **Weigel,** H. Studies on dextrans and dextranases. Part VIII. Size and distribution of branches in some dextrans, 827.

Abbott, D., and **Weigel,** H. Studies on dextrans and dextranases. Part VI. Type and degree of branching in two dextrans. Part VII. Structures of oligosaccharides from α-1 ⟶ 4-branched dextran, 816, 821.

Abramovitch, R. A., and **Hey,** D. H. The condensation of 2,3-dihydro-2-oxoimidazo[1,2-*a*]pyridine with *o*-nitrobenzaldehyde, 1095.

Acheson, R. M., and **Foxton,** M. W. Addition reactions of heterocyclic compounds. Part XXV. Dimethyl acetylenedicarboxylate with pyradazines and pyrazines, 2218.

Adam, D. J., **Crombie,** L., **Siddalingaiah,** K. S., and **Whiting,** D. A. Novel features in the chemistry of (±)-6a,12a-dihydrorotoxen-12(6*H*)-one, synthetic parent compound of the natural rotenoids, 544.

Adam, D. J., **Crombie,** L., and **Whiting,** D. A. The stereochemistry and conformation of (±)-6a-12a-dihydrorotoxen-12(6*H*)-one and natural rotenoids from spin-coupling considerations, 542.

Aspects of the chemistry of 6,6a-dehydrorotenol, rotenononic acid, and isoderrisic acid acetates, 550.

Adcock, B., and **Lawson,** A. 2-Amino-2-imidazolines and 2-amino-2-oxazolines. Part III, 65.

Adesogan, E. K., **Bevan,** C. W. L., **Powell,** J. W., and **Taylor,** D. A. H. West African timbers. Part XVIII. Some reactions of *Cedrela odorata* substance "B" and khayasin 2127.

Adley, T. J., and **Owen,** L. N. Thio-sugars. Part I. The thiopyranose, ring, 1287.

Agnew, N. H., and **Parrish,** J. R. Syntheses and properties of *N*-allyl derivatives of ethylenediamine and diethylenetriamine, 203.

Agolini, F., **Bonnett,** R., **McGreer,** D. E., and **Stephenson,** G. F. Studies in the pyrroline series. Part VI. The formulation of the base $C_{13}H_{23}NO_3$ as a 1-pyrroline 1-oxide, 1491.

Ahmad, S. A., **Rigby,** W., and **Taylor,** R. B. Gamboge. Part II, 772.

Ainsworth, D. P., and **Suschitzky,** H. Preparative routes to t-amine-substituted nitroanilines, 111.

Akhtar, M., and **Marsh,** S. Synthesis of a medium-size ring *via* alkoxy radical decomposition, 937.

Akisanya, A., **Arene,** E. O., **Bevan,** C. W. L., **Ekong,** D. E. U., **Nwaji,** M. N., **Okogun,** J. I., **Powell,** J. W., and **Taylor,** D. A. H. West African timbers. Part XII. The interrelation of gedunin and khivorin, 506.

Albert, A., and **McCormack,** J. J. Pteridine studies. Part XXXII. Nucleophilic addition reactions of 2-aminopteridine, 1117.

Albonico, S. M., **Comin,** J., **Kuck,** A. M., **Sanchez,** E., **Scopes,** P. M., **Swan,** R. J., and **Vernengo,** M. J. Optical rotatory dispersion. Part XXXVI. Quaternary compounds of 1-benzyltetrahydroisoquinolines and of aporphines, 1340.

Alden, C. K., **Claisse,** J. A., and **Davies,** D. I. The addition of ethanethiol and methanethiol to hexachloronorbornadiene, 1540.

Alden, C. K. See also **Claisse,** J. A., 1498.

Alder, R. W., **Chalkley,** G. R., and **Whiting,** M. C. Aromatic arylaminocarbonylation, 52.

Aldridge, D. C., **Grove,** J. F., and **Turner,** W. B. 4-Acetyl-6,8-dihydroxy-5-methyl-2-benzopyran-1-one, a metabolite of *Aspergillus viridinutans*, 126.

Alford, E. J., **Hall,** J. A., and **Rogers,** M. A. T. Aliphatic hydroxylamines. Part IV. *N*-Hydroxyhexamethyleneimine, 1103.

Amaral, M. J. S. A., **Barrett,** G. C., **Rydon,** H. N., and **Willett,** J. E. Polypeptides. Part XIII. The use of β-methylthioethyl esters for the protection of carboxyl groups in peptide synthesis, 807.

Ambekar, S. Y., and **Siddappa,** S. The synthesis of 5,6-benzindole-3-acetic acid and 2-(5,6-benzindol-3-yl)ethylamine, 477.

Ames, D. E., **Chapman,** R. F., and **Waite,** D. Cinnolines. Part VIII. Methylation of some substituted cinnolines, 470.

Anderson, D. M. W., **Hirst,** Sir E., and **Stoddart,** J. F. Studies on uronic acid materials. Part XVII. Some structural features of *Acacia senegal* gum (gum arabic), 1959.

Anderson, D. M. W., and **Karamalla,** K. A. Studies on uronic acid materials. Part XII. The composition of *Acacia* gum exudates, 762.

Anderson, H. A., and **Thomson,** R. H. Naturally occurring quinones. Part VII. Synthesis of spinochrome E, 426.

Anderson, H. A., **Thomson,** R. H., and **Wells,** J. W. Naturally occurring quinones. Part VIII. Solorinic acid and norsolorinic acid, 1727.

Anderson, M., and **Johnson,** A. W. Rearrangement reactions of dimethyl 2,7-dimethyl-3*H*-azepine-3,6-dicarboxylate, 1075.

Angyal, S. J., **Bender,** V., and **Curtin,** J. H. Cyclitols. Part XXIII. Suppression of epoxide migration. Synthesis of mucoinositol, 798.

Angyal, S. J., and **Shelton,** B. Cyclitols. Part XXII. Synthesis of some mannosyl- and mannosyl-mannosyl-myoinositols, and of galactinol, 433.

Anirudhan, C. A., **Mathieson,** D. W., and **Whalley,** W. B. A novel rearrangement in the catechin series, 634.

Anirudhan, C. A., **Whalley,** W. B., and **Badran,** M. M. E. The chemistry of the "insoluble red" woods. Part X. Synthesis of isoflavans, isoflav-3-enes, and isoflavylium salts, 629.

Aplin, R. T., **Arthur,** H. R., and **Hui,** W. H. The structure of the triterpene simiarenol (an E: B-*friedo*-hop-5-ene) from the Hong Kong species of *Rhododendron simiarum*, 1251.

Appleton, R. A., **McAlees,** A. J., **McCormick,** A., **McCrindle,** R., and **Murray,** R. D. H. The acid-catalysed rearrange-

ment of diterpene hydrocarbons. Part I. Kaurene, isosatisirene, stachene, and trachylobane, 2319.
Archer, G. A., **Stempel,** A., **Ho,** S. S., and **Sternbach,** L. H. Quinazolines and 1,4-benzodiazepines. Part XXIX. Synthesis of some 2,3-dihydro-5-pyridyl-1*H*-1,4-benzodiazepines, 1031.
Arene, E. O., and **Taylor,** D. A. H. Some substitution reactions of 1-methyl- and 2-methoxy-fluorene, 481.
Arene, E. O. See also **Akisanya,** A., 506.
Armarego, W. L. F., **Batterham,** T. J., **Schofield,** K., and **Theobald,** R. S. Reactions of methazonic acid. Part V. Formation of quinazoline 3-oxides, 1433.
Armarego, W. L. F., and **Smith,** J. I. C. Quinazolines. Part VIII. Electronic effects in 2-substituted quinazolines, 234.
Arthur, H. R. See **Aplin,** R. T., 1251.
Ashurst, P. R., and **Elvidge,** J. A. The chemistry of hop constituents. Part XXVIII. The structure of an autoxidation product of humulone, 675.
Ashurst, P. R., and **Laws,** D. R. J. The chemistry of hop constituents. Part XXIX. A synthesis of (±)-isohumulone, 1615.
Aspinall, G. O., **Hunt,** K., and **Morrison,** I. M. Polysaccharides of soy-beans. Part II. Fractionation of hull cell-wall polysaccharides and the structure of a xylan, 1945.
Aspinall, G. O., and **McGrath,** D. The hemicelluloses of lucerne, 2133.
Asquith, R. S., **Lord,** W. M., **Peters,** A. T., and **Wallace,** F. Reactions in *NN*-dimethylformamide solution. Anomalous halogen replacements, 95.
Atkinson, C. M., and **Biddle,** B. N. Triazaphenanthrenes. Part VI. Further observations on the Widman–Stoermer and Borsche reactions, 2053.
Atkinson, J. H., **Atkinson,** R. S., and **Johnson,** A. W. The structure of the formyl derivative of 3,4-dimethyl-3-pyrrolin-2-one, 40.
Atkinson, J. H., **Johnson,** A. W., and **Raudenbusch,** W. Condensation reactions of 5-(pyrrol-2-ylmethyl)pyrrolidones and related compounds, 1155.
Atkinson, R. E., **Curtis,** R. F., and **Phillips,** G. T. Naturally-occurring thiophens. Part II. 5-(4-Chloro-3-hydroxybut-1-ynyl)-2,2′-bithienyl from *Tagetes minuta* L., 1101.
Atkinson, R. S. See **Atkinson,** J. H., 40.

B

Bacon, R. G. R., **Hanna,** W. J. W., and **Stewart,** D. Oxidation by persulphate. Part V. Silver-catalysed oxidation of secondary aliphatic amines and α-amino-acids, 1388.
Bacon, R. G. R., and **Izzat,** A. R. Metal ions and complexes in organic reactions. Part VI. A comparison of oxidants for 2,6-dimethylphenol, 791.
Bacon, R. G. R., and **Stewart,** D. Oxidation by persulphate. Part IV. Silver-catalysed oxidation of primary aliphatic amines, 1384.
Badar, Y., **Cooke,** A. S., and **Harris,** M. M. Optically active 7-oxodibenz[*a,kl*]anthracene-13-carboxylic acid and its methyl ester, 1315.
Baddar, F. G., **Baghos,** V. B., and **Habashi,** A. γγ-Disubstituted itaconic acids. Part III. The Stobbe condensation of *o*- and *p*-chlorobenzophenone with succinic esters, 603.
Baddiley, J. See **Brundish,** D. E., 521.
Badr, Z., **Bonnett,** R., **Klyne,** W., **Swan,** R. J., and **Wood,** J. Optical rotatory dispersion. Part XXXVIII. Azomethines. Part III. Configurational assignment in the α-amino-acid series using *N*-alkylidene derivatives, 2047.
Badran, M. M. E. See **Anirudhan,** C. A., 629.
Baggett, N., **Buck,** K. W., **Foster,** A. B., **Rees,** B. H., and **Webber,** J. M. Aspects of stereochemistry. Part XXIV. The acid-catalysed rearrangement of 2,4-*O*-benzylidene-D-erythrose and 2,3-*O*-benzylidene-erythritol, 212.
Baggett, N., **Duxbury,** J. M., **Foster,** A. B., and **Webber,** J. M. Aspects of stereochemistry. Part XXIII. Configuration of some 2,4-disubstituted derivatives of 1,3-dioxolan, 208.
Baghos, V. B. See **Baddar,** F. G., 603.
Bagley, E., **Birchall,** J. M., and **Haszeldine,** R. N. Perfluoroalkyl derivatives of nitrogen. Part XXII. The reaction of nitric oxide with hexafluoropropene, 1232.
Baig, M. V. A., and **Owen,** L. N. Cytotoxic compounds. Part VIII. Some *S*-α-(acylamino)acyl-*p*-[di-(2-halogenoethyl)amino]thiophenols, 540.
Bailey, A. S., and **Merer,** J. J. The reactions of 2-alkyl- and 2-aryl-indoles with azides, 1345.
Baillie, A. C., and **Thomson,** R. H. Quinones. Part VII. New routes to 2-hydroxy-1,4-naphthaquinones, 2184.
Baker, P. M., and **Roberts,** J. C. Studies in mycological chemistry. Part XXI. The structure of aurofusarin, a metabolite of some *fusarium* species, 2234.
Balasubrahmanyam, S. N. See **Banerjee,** D. K., 1458.
Balucani, D. See **Buu-Hoï,** N. P., 47.
Bamfield, P., **Harris,** R. L. N., **Johnson,** A. W., **Kay,** I. T., and **Shelton,** K. W. Synthesis of rhodoporphyrin XV diethyl ester and related porphins, 1436.
Bamfield, P., **Johnson,** A. W., and **Katner,** A. S. Diels–Alder reactions of oxindolylideneacetone, 1028.
Bamford, W. R., **Lovie,** J. C., and **Watt,** J. A. C. Preparation and properties of polysilmethylenes: Use of various compounds of Group VIII metals as catalysts, 1137.
Banerjee, D. K., **Balasubrahmanyam,** S. N., and **Ranganathan,** R. Syntheses of the *trans,meso*- and racemic C_{11} acids, degradation products of diterpene acids, 1458.
Banks, R. E., **Barlow,** M. G., **Deem,** W. R., **Haszeldine,** R. N., and **Taylor,** D. R. Polyhalogenoallenes. Part III. Isomerisation of the dimer of tetrafluoroallene, perfluoro-(1,2-dimethylenecyclobutane), to perfluoro-(2-methyl-3-methylenecyclobutene), 981.
Banks, R. E., **Barlow,** M. G., **Haszeldine,** R. N., and **McCreath,** M. K. Perfluoroalkyl derivatives of nitrogen. Part XXIV. Perfluoroalkylnitroso-compounds from perfluoroacyl nitrites, 1350.
Banks, R. E., **Deem,** W. R., **Haszeldine,** R. N., and **Taylor,** D. R. Polyhalogenoallenes. Part IV. Thermal codimerisation of tetrafluoroallene with hexafluorobut-2-yne, 2051.
Banks, R. E., **Harrison,** A. C., and **Haszeldine,** R. N. Polyfluorocyclopentadienes. Part II. The thermal dimer of perfluorocyclopentadiene: perfluoro(tricyclo-[5,2,1,$0^{2,6}$]-deca-3,8-diene), 2102.
Banks, R. E., **Haslam,** G. M., **Haszeldine,** R. N., and **Peppin,** A. Perfluoroalkyl derivatives of sulphur. Part VIII. Synthesis and reactions of perfluoroethylenesulphonyl fluoride, 1171.
Banks, R. E., **Haszeldine,** R. N., and **Lalu,** J. P. *N*-Fluoro-compounds. Part I. Synthesis of *N*-fluoro-compounds by direct fluorination of aqueous substrates, 1514.

Banks, R. E., **Haszeldine,** R. N., and **Stevenson,** M. J. Perfluoroalkyl derivatives of nitrogen. Part XXI. Some reactions of bistrifluoromethylnitroxide, 901.

Banks, R. E., and **Moore,** G. J. Studies in azide chemistry. Part I. Synthesis of perfluoropropenyl azide and its conversion into perfluoro-(2- and 3-methyl-2*H*-azirine), 2304.

Barber, M. S., **Jackman,** L. M., **Manchand,** P. S., and **Weedon,** B. C. L. Carotenoids and related compounds. Part XVI. Structural and synthetic studies on spilloxanthin, chloroxanthin, spheroidene, and spheroidenone, 2166.

Barker, S. A., **Brimacombe,** J. S., and **Milner,** D. J. Effect of γ-radiation. Part X. Action of γ-radiation on oxygenated solutions of DL-mandelic acid, 511.

Barlow, M. G., **Green,** M., **Haszeldine,** R. N., and **Higson,** H. G. Organophosphorus chemistry. Part V. Preparation of pentafluorophenylphosphorus chlorides and their reactions with amines, 1592.

Barlow, M. G. See also **Banks,** R. E., 981, 1350.

Barnett, C., **Cleghorn,** H. P., **Cross,** G. E., **Lloyd,** D., and **Marshall,** D. R. Diazepines. Part IV. Dihydrodiazepinum salts from the condensation reaction between *NN'*-disubstituted ethylenediamines and β-dicarbonyl compounds, 93.

Barrera, J. B., **Funes,** J. L. B., and **González,** A. G. Terpenoids of the Sonchus. Part III. Sesquiterpene lactones of *S. Jacquini* D.C., *S. pinnatus* Ait, and *S. radicatus* Ait, 1298.

Barrett, G. C. The circular dichroism of *N*-thiobenzoyl-L-α-amino-acids. Part II. Further examples of solvent-dependent circular dichroism, 1771.

Barrett, G. C. See also **Amaral,** M. J. S. A., 807.

Bartels-Keith, J. R. Syntheses related to northebaine. Part I. Northebaine and *N*-allylnorthebaine, 617.

Barton, D. H. R., **Kirby,** G. W., and **Wiechers,** A. Phenol oxidation and biosynthesis. Part XI. The structure of stebisimine and the biosynthesis of epistephanine, 2313.

Barton, D. H. R. See also **Haynes,** L. J., 1676.

Barton, M. A., **Kenner,** G. W., and **Sheppard,** R. C. Peptides. Part XXI. Dehydrogenation of some thiazolines derived from cysteine. Part XXIII. Experiments on the oxidation of thiostrepton, 1061, 2115.

Bass, K. C., and **Nababsing,** P. Pyrolysis of dibenzylmercury and diphenylmercury in aromatic hydrocarbons, 1184.

The reaction of benzyl and phenyl radicals with indene, 2019.

Batterham, T. J. Dihydration (covalent) of condensed pyrazine heterocycles, 999.

Batterham, T. J. See also **Armarego,** W. L. F., 1433.

Battersby, A. R., **Southgate,** R., **Staunton,** J., and **Hirst,** M. Synthesis of (+)- and (−)-scoulerine and of (+)- and (−)-coreximine, 1052.

Bayly, R. J., and **Turner,** J. C. The preparation of 2-deoxy-D-[1-^{14}C]ribose, 704.

Beacham, J., **Ivanov,** V. T., **Scopes,** P. M., and **Sparrow,** D. R. Optical rotatory dispersion. Part XXXVII. Tri- and tetra-peptides of alanine and serine, 1449.

Bebbington, A., and **Ley,** R. V. The reaction of 2,4-dinitrofluorobenzene with phosphoro- and phosphono-thiolates, 1410.

Bedford, G. R., **Partridge,** M. W., and **Stevens,** M. F. G. Pyrazolo-*as*-triazines. Part II. Bromination, 1214.

Bee, J. A., and **Rose,** F. L. *s*-Triazolopyrimidines. Part IV. Synthesis as potential therapeutic agents, 2031.

Bell, D. J. Spectrophotometric microdeterminations of aldoses with *p*-aminobenzoic acid, 1638.

Bell, F., and **Buck,** K. R. Some reactions of dimethoxynaphthalenes. Part II. The orientation of naphthalene derivatives by nuclear magnetic resonance spectrometry, 904.

Bell, F., and **Millar,** A. S. Nitration and bromination of 3-toluene-*p*-sulphonamidoveratrole, 375.

Bell, F., and **Spanswick,** J. Some derivatives of indan-1-one, 1887.

Bell, J. A., and **Dunstan,** I. Chemistry of nitramines. Part I. Some reactions of 3-acetoxymethyl-1,5-dinitro-1,3,5-triazacycloheptane and related compounds. Part II. Some reactions of 1-acetoxymethyl-3,5-dinitro-1,3,5-triazacyclohexane and 1-acetoxymethyl-3,5,7-trinitro-1,3,5,7-tetra-azacyclo-octane. Part III. Cyclic nitramines derived from trimethylenedinitramine, 862, 867, 870.

Bellamy, A. J., **Guthrie,** R. D., and **Chittenden,** G. J. F. Studies on the possible interconversion of phenylhydrazones and phenylazoalkanes. Part III. Adipaldehyde bisphenylhydrazone, 1989.

Bellas, M., and **Suschitzky,** H. Syntheses of heterocyclic compounds. Part XII. Halogen-substituted 3-arylsydnones, 189.

Bellavita, V. See **Buu-Hoï,** N. P., 47.

Belsky, I. See **Frankel,** M., 493.

Bender, V. See **Angyal,** S. J., 798.

Bentley, P. H., and **Morley,** J. S. Polypeptides. Part II. A " hydrazine-peptide " analogue of norophthalmic acid amide, 60.

Bergmann, E. D., and **Shahak,** I. Organic fluorine compounds. Part XXXV. The reaction of ethylene carbonates with nucleophilic reagents, 899.

Bergmann, E. D. See also **Shahak,** I., 1005.

Bergmann, F., **Neiman,** Z., and **Kleiner,** M. New derivatives of 3-methylpurine, 10.

Bevan, C. W. L., **Ekong,** D. E. U., **Obasi,** M. E., and **Powell,** J. W. West African timbers. Part XIII. Extracts from the heartwood of *Amphimas pterocarpoides* and *Pterocarpus erinaceous*, 509.

Bevan, C. W. L. See also **Adesogan,** E. K., 2127, and **Akisanyi,** A., 506.

INDEX OF SUBJECTS, 1966

A

Acacia gum exudates, composition of. Studies on uronic acid materials. Part XII, 762.

Acetonitrile, benzyloxy-, and methyl benzyloxyacetimidate, 2071.

Acetylenes, natural. Part XVIII, some allenic polyacetylenes from Basidiomycetes, 129. Part XIX, metabolites from some *Poria* species, 135. Part XX, tetra-acetylenic and other metabolites from *Fistulina hepatica* (Huds) Fr., 139. Part XXI, the biosynthesis and transformation of some polyacetylenic metabolites of *Merulius lacrymans* Fr. and *Clitocybe rhizophora* Velen, 144. Part XXII, *trans*-dehydromatricaria ester as a biosynthetic precursor of some fungal polyacetylenes, 1216. Part XXIII, a C_{18} polyacetylenic keto-aldehyde related to falcarinone from an Umbellifer (*Pastinaca sativa* L.), 1220. Part XXIV, the biological oxidation of dehydromatricarianol, 1617.

Acetylenic and olefinic substances, hydrogenation of. The influence of stereochemistry and substitution on chemisorption and on chromatography, 458.

Acid halides, unsaturated, reactions of. Part I, aluminium chloride-catalysed reactions of phenylpropioloyl chloride with benzene, 1703.

Acids, β-aryl-α-oxoglutaric, 1924.

Acids. A synthesis of β-(2,4-dibromo-5-methoxyphenyl)-propionic acid using di-imide, and some observations on *p*-benzyloxyphenylacetic acid, 1206.

1-Amino-2-nitrocyclopentanecarboxylic acid. A new naturally-occurring nitro-compound, 255.

Derivatives of 2,4-dimethoxyphenylglyoxylic acid and 2,4-dimethoxymandelic acid, 1221.

Derivatives of thiocarbamic acid. Part I, preparation of 4-substituted thiosemicarbazides, 950. Part II, the formation of 1,2,4-triazole salts from amines and methyl dithiocarbazate. Some attempts to prepare substituted 1-thiocarbamoylthiocarbohydrazides, 1256.

Dimethylenation of phosphorus tribromide. Synthesis of derivatives of di(bromomethyl)phosphinic acid, 1096.

γγ-Disubstituted itaconic acids. Part III, the Stobbe condensation of *o*- and *p*-chlorobenzophenone with succinic esters, 603.

Effect of γ-radiation. Part X, action of γ-radiation on oxygenated solutions of DL-mandelic acid, 511.

Extractives from East Africa timbers. Part III, the identification of volatile acids from complex natural esters, 949.

Organosilicon compounds. Part XXXVII, optical resolution of *p*-(ethylmethylphenylsilyl)benzoic acid, 1524.

Metabolism of substituted 4-phenoxybutyric acids by *Aspergillus niger*. Fungal detoxication. Part VIII, 884.

Methyl derivatives of trithiocyanuric acid, 909.

Persulphate oxidation of carboxylic acids. Part II, oxidation of *o*-phenoxybenzoic acids, 321.

Polyene acids. Part VIII, the isomeric muconic diamides and muconotriles, 385. Part IX, proton magnetic resonance parameters of the muconic esters and muconononitriles, 387.

Reactions of 2-ethylnyl-2-hydroxy-1,3-dimethylcyclohexanecarboxylic acid, 764.

Reactions of methazonic acid. Part V, formation of quinazoline 3-oxides, 1433.

Some studies on optically active α-aminophenylacetic acid and its derivatives, including phenylethylenediamine, 393.

Stereospecific preparation of *N*-alkyl- and *N*-aralkyl-α-amino-β-hydroxy-acids, 1301.

Syntheses of the *trans*, *meso*- and racemic C_{11} acids, degradation products of diterpene acids, 1458.

The effects of 3′- and 4′-substituents on the ionisation constants of biphenyl-4-carboxylic acid and 4-aminobiphenyl, 831. The effects of 2′-substituents on the ionisation constants of biphenyl-4-carboxylic acid, 4-aminobiphenyl, and 4-biphenylylacetic acid, 837. The synthesis of some substituted biphenyl-4-carboxylic acids, 4-biphenylylacetic acids, and 4-aminobiphenyls, 840.

The hydrolysis of alkanesulphonic acids, 163.

The nitration of α-phenyl-*o*-toluic acid, 218.

The oxidation of hydroxamic acid, 354.

The synthesis of (±)-3-ethyl-3-methyl-6-oxoheptanoic acid. The chemistry of fungi. Part LIV, 627.

Acorone, stereochemistry of. *X*-ray analysis of acorone *p*-bromophenylsulphonylhydrazone, 579.

Acridine, 1,2,3,4-tetrafluoro-, the synthesis of some derivatives of. Aromatic polyfluoro-compounds. Part XXXIII, 2020.

Acridines and benzacridines with fluoro- and trifluoromethyl-substituents. Carcinogenic nitrogen compounds. Part L, 87.

9-Acridone, from 2,2′-diaminobenzophenone, 87.

Actinomycin analogues, the synthesis of. Part II, actinocylgramicidin S, 1406.

Acylhydrazones, geometrical isomerism of, and the reaction of sulphinylhydrazides with aromatic aldehydes, 283.

Adipaldehyde bisphenylhydrazone. Studies on the possible interconversion of phenylhydrazones and phenylazoalkanes. Part III, 1989.

Ætioporphyrin I, *meso*-substitution products of, 794.

Alanine and serine, tri- and tetra-peptides of. Optical rotatory dispersion. Part XXXVII, 1449.

Alcohols, the reactions of tetraphenyldiphosphine with, 722.

Some alcohols with sedative action, and their esters. Trihalogenomethyl compounds of potential therapeutic interest. Part VI, 670.

Aldehydes, aromatic, reaction with sulphinylhydrazides, and the geometrical isomerism of acylhydrazones, 283.

Aldoses, spectrophotometric microdeterminations of, with *p*-aminobenzoic acid, 1638.

Alkaloids, *Buxus*. Part VII, the isolation and constitutions of ten new alkaloids from the weak-base fractions of two species, *B. microphylla* Sieb. *et* Zucc. *var. suffruticosa* Makino and *B. microphylla* Sieb. *et* Zucc. *var.*

Alkaloids (*contd.*)
suffruticosa Makino *forma major* Makino, 1412. Part VIII, the isolation and constitution of a new alkaloid, cyclokoreanine-*B*, from *B. koreana* Nakai, and the conversion of cyclomikuranine into cyclovirobuxine-*A*, 1805.
from *Croton* species. Part III, the constitution of the proaporphines crotonosine, " homolinearisine ", base A, and the dihydroproaporphine linearisine, 1676. Part IV, the isolation and structure of a new proaporphine derivative from *Croton linearis* Jacq., 1680. Part V, configuration of linearisine and circular dichroism of proaporphine-type alkaloids, 1681.
from Greenheart. Part III, the structure of rodiasine. Mass spectra of bisbenzylisoquinoline alkaloids, 1082.
heptacyclic, four from *Aspidosperma* species, 1260.
of the genus *Datura*, section Brugmansia, the. Part IV, new alkaloids of *D. sanguinea* R. and P., 1621.
of *Uncaria pteropoda*. Isolation and structure of pteropodine and isopteropodine, 2245.
pyrrolizidine. The biosynthesis of echimidinic acid, 1968.
quinoline. Part VII, the synthesis of khaplofoline, 1084. Part VIII, the synthesis and nuclear magnetic resonance spectra of (±)-platydesmine, (±)-isobalfourodine, and related compounds, 1504.
Coreximine and related compounds. Part IV, a total synthesis of (±)-correximine, 2010.
Mass spectra of ψ-pelletierine, 9-methyl-3-oxagranatan-7-one, and 9-methyl-3-oxagranatan-7α-ol, 1207.
(++)-4″-*O*-Methylcurine from *Cissampelos pareira* L., 615.
Phenol oxidation. Part I, the synthesis of isoboldine and glaucine, 2061. Part II, synthesis of orientalinone, corydine, and isocorytuberine, 2222.
Phenol oxidation and biosynthesis. Part IX, the biosynthesis of norpluviine and galanthine, 676. Part XI, the structure of stebisimine and the biosynthesis of epistephanine, 2313.
Optical rotatory dispersion. Part XXXVI, quaternary compounds of 1-benzyltetrahydroisoquinolines and of aporphines, 1340.
Organic reactions in aqueous solution at room temperature. Part IV, *in vitro* oxidation of a benzylisoquinoline alkaloid to an aporphine alkaloid, 753.
Steric effects in the mass spectra of aporphine alkaloids, 2181.
Studies on the syntheses of heterocyclic compounds. Part CXXXV, the structure of corpaverine, 715.
Synthesis of (+)- and (−)-scoulerine and of (+)- and (−)-coreximine, 1052.
Syntheses related to northebaine. Part I, northebaine and *N*-allylnorthebaine, 617.
The biosynthesis of folicanthine, 1570.
The high-resolution mass spectra of bisbenzyltetrahydroisoquinoline alkaloids. The structure of hayatin, 1966.
Alkanes, diazo-, 1,3-dipolar cycloaddition reactions of. Part I, kinetics and mechanism of the reactions between diazomethane or diazoethane and methyl acrylate or methyl methacrylate, 1408.
polyhalogenated. Reactions of tervalent phosphorus–nitrogen compounds, 1001.
Alkanesulphonic acids, hydrolysis of, 163.
Alk-2-en-4-yn-1-ols and furans from alkali-metal acetylides and epichlorohydrin, 2283.
Alkylation of compounds containing activated methylene and methine groups. Synthetic aspects of free-radical addition reactions. Part V, 1743.
Allenes. Part XI, the preparation of 3-alkyl- and 3,3-dialkyl-1-bromo-allenes, 1223. Part XII, 1,4-eliminations from 1-bromoallenes, 1976.
polyhalogeno-. Part III, isomerisation of the dimer of tetrafluoroallene, perfluoro-(1,2-dimethylenecyclobutane), to perfluoro-(2-methyl-3-methylenecyclobutene), 981. Part IV, thermal co-dimerisation of tetrafluoroallene with hexafluorobut-2-yne, 2051.
D-Allose, 6-deoxy-3-*O*-methyl-, a synthesis of, 499.
Amide as a protecting group in phosphate ester synthesis. Part I, the acid hydrolysis of some phosphoramidic diesters, 637. Part II, a non-hydrolytic conversion of phosphoramidates into phosphates, 640.
Amides, trialkylstannylation of. Organometallic reactions. Part V, 1311.
Amidines, α-amino-, some studies on, 390.
cyclic. Part XX, polyaza- and oxapolyaza-benzonaphthanthracenes, 1245.
Amine oxidation. Part IX, reactions of trialkylamines with manganese dioxide, 995.
Amines, aromatic. An alternative to the Sandmeyer reaction, 1249.
condensations of acylpyridines with. Part I, 2-acylpyridines and aminoacetal, 1209.
α-hydroxy-, steroid; reactions of some. Steroids and Walden inversion. Part LIX, 1023.
primary aliphatic, silver-catalysed oxidation of. Oxidation by persulphate. Part IV, 1384.
secondary aliphatic, and α-amino-acids, silver-catalysed oxidation of. Oxidation by persulphate. Part V, 1388.
steroid. Part I, 17β-aminoandrostane derivatives, 1688. Part II, 17α-aminoandrostane derivatives, 1698. Part III, 3-aminoandrostane derivatives, 1983.
Formation of Grignard reagents from 3-bromo-*NN*-dimethylbenzylamine and 4-bromo-*NN*-diethylbenzylamine and their reactions with benzaldehyde, 313.
Some reactions of dialkylamino-radicals, 813.
Some studies on optically active α-aminophenylacetic acid and its derivatives, including phenylethylenediamine, 393.
Studies on the reaction of benzoyl peroxide with *NN*-dialkyl aromatic amines and other related compounds. Part I, the formation of *N*-*p*-dimethylaminobenzyl-*N*-methylaniline from *NN*-dimethylaniline, 1605.
Synthesis and properties of *N*-allyl derivatives of ethylenediamine and diethylenetriamine, 203.
Synthesis of trimethylsilylphenethylamines, 379.
The action of sulphur monochloride on *o*-nitroanilines and *o*-phenylenediamines: the formation of 2,1,3-benzothiadiazoles, 1283.
The deamination of 3β- and 3α-amino-5α-cholestane. Steroids and Walden inversion. Part LVIII, 1018.
The effects of 3′- and 4′-substituents on the ionisation constants of biphenyl-4-carboxylic acid and 4-aminobiphenyl, 831. The effects of 2′-substituents on the ionisation constants of biphenyl-4-carboxylic acid, 4-aminobiphenyl, and 4-biphenylacetic acid, 837. The synthesis of some substituted biphenyl-4-carboxylic acids, 4-biphenylacetic acids, and 4-aminobiphenyls, 840.
The preparation of some polyamino-compounds, 527.

α-Amino-acid series, configurational assignment in, using *N*-alkylidene derivatives. Optical rotatory dispersion. Part XXXVIII, Azomethines. Part III, 2047.

L-α-Amino-acids, *N*-thiobenzoyl-, the circular dichroism of. Part II, further examples of solvent-dependent circular dichroism, 1771.

Amino-acids, dibasic sulphur-containing, related to L-lysine, synthesis of, 1098.

phosphono-, and ninhydrin, metaphosphate formation from, 1349.

An asymmetric synthesis of *N*-benzyl-D-aspartic acid, 1200.

Stereospecific preparation of *N*-alkyl- and *N*-aralkyl-α-amino-β-hydroxy-acids, 1301.

The addition of L-cysteine to unsaturated lactones and related compounds, 1123.

Amino-alcohols, di- and tri-, synthesis of, from the corresponding tri- and tetra-carboxylic acids. Anhydride formation with thionyl chloride, 1734.

Aminophenyl groups, the protection of, in organometallic syntheses, 1706.

Amphimas pterocarpoides, extractives from the heartwood of. West African timbers. Part XIII, 509.

Analgesics related to 3-dimethylamino- and 3-morpholino-1,1-diphenylpropane, configurational studies in, 683.

Andirobin, correlation with gedunin and methyl angolensate. West African timbers. Part XVII, 944.

Androstane, 3-amino-, derivatives. Steroid amines. Part III, 1983.

17β-amino-, derivatives. Steroid amines. Part I, 1688.

17α-amino-, derivatives. Steroid amines. Part II, 1698.

Angolensic acid, methyl ester, correlation with gedunin and andirobin. West African timbers. Part XVII, 944.

Anhydride formation with thionyl chloride. The synthesis of di- and tri-amino-alcohols from the corresponding tri- and tetra-carboxylic acids, 1734.

Anilines, bis-, preparation and *C*-formylation of some, 666.

NN-diacyl-. Molecular rearrangements. Part VII, 1305.

nitro-, t-amine-substituted, preparative routes to, 111.

Anodic oxidation. Part I, the electrolysis of ethyl sodioacetoacetate in ethanolic systems, 336.

Anthracene, formation of mono- and di-ketones in the Friedel–Crafts acetylation of, 1729.

Anthranilic acid, 3,4,5,6-tetrachloro-, the diazotisation of: a convenient synthesis of 2,3,4,5-tetrachlorophenol, 478.

Anthraquinone, 1,3,6,8-tetrahydroxy-2-(1-hydroxyhexyl)-, "product B" (averantin), a pigment from *Aspergillus versicolor* (Vuillemin) Tiraboschi. Studies in mycological chemistry. Part XIX, 855.

Anti-tumour agents, potential. Part IV, polyporic acid series, 1041.

Aphididae, colouring matters of. Part XXVIII, a coupling reaction involving phenols and quinones. Reconstruction of the protoaphins, and synthesis of the chrysoaphin chromophore, 1825. Part XXIX, partial synthesis of erythroaphin and related systems by oxidative coupling, 1832. Part XXX, coupling reactions involving the quinone A, derived by reduction of protoaphin-*fb*, 1836.

Aporphine alkaloids, steric effects in the mass spectra of, 2181.

Aporphines, and 1-benzyltetrahydroisoquinolines, quaternary compounds of. Optical rotatory dispersion. Part XXXVI, 1340.

α- and β-L-Arabinofuranosides, ethyl 1,5-dideoxy-5-ethylthio-1-mercapto-, formation by an intramolecular displacement of 5-*O*-toluene-*p*-sulphonyl-L-arabinose diethyl dithioacetal, 2366.

Arabinopyranosides, methyl 3,4-anhydro-, and methyl 2,3-anhydrolyxopyranosides, 1926.

Aromatic polyfluoro-compounds. Part XXXI, the synthesis and reactions of some halogenomethylpentafluorophenylmethanols and routes to some pentafluorophenylacetylenes, 597. Part XXXIII, the synthesis of some derivatives of 1,2,3,4-tetrafluoroacridine, 2020. Part XXXVII, nitration of some polyfluoro-benzenes and -biphenyls, 2323.

A synthesis of β-(2,4-dibromo-5-methoxyphenyl)propionic acid using di-imide, and some observations on *p*-benzyloxyphenylacetic acid, 1206.

An alternative to the Sandmeyer reaction, 1249.

β-Aryl-α-oxoglutaric acids, 1924.

Benzyloxyacetonitrile and methyl benzyloxyacetimidate, 2071.

Condensation of *p*-cresol with carbon tetrachloride, 1519.

Conversion of substituted-benzylidene hydrazines into hydrazides, 1319.

Cytotoxic compounds. Part VII, α-aryl-α-halogenoacetophenones, their enol acetates, and related compounds, 533. Part VIII, some *S*-α-(acylamino)acyl-*p*-[di-(2-halogenoethyl)amino]thiophenols, 540.

Derivatives of 2,4-dimethoxyphenylglyoxylic acid and 2,4-dimethoxymandelic acid, 1221.

2-(2-Dialkylaminoethoxy)methyl-*trans*-stilbenes, 668.

Displacement of an acetamido- and a nitro-group during bromination of an aromatic compound, 997.

Electrochemical reactions. Part I, the stereochemistry of some hydrobenzoins from the reduction of benzaldehyde derivatives, 653.

Interaction of benzenedisulphonyl chlorides, aluminium chloride, and benzene, 1284.

Molecular rearrangements. Part VII, *NN*-diacylanilines, 1305.

Nuclear magnetic resonance and mass spectra of nitrosobenzene derivatives, 1334.

Polar influences in radical reactions. Part V, hydrogen abstraction from nuclear-substituted ethylbenzenes and benzhydryl methyl ethers by atomic bromine, 935.

Preparation and *C*-formylation of some bis-anilines, 666.

Preparation of chlorofluorobenzenes and chlorofluoropyridines by halogen exchange with fused salts, 2142.

Pyrolysis of dibenzylmercury and diphenylmercury in aromatic hydrocarbons, 1184.

Reactions of metal fluorides with polyfluorobenzenes, 708.

Reactions of unsaturated acid halides. Part I, aluminium chloride-catalysed reactions of phenylpropioloyl chloride with benzene, 1703.

Reactions with asymmetrical diarylethylenes and diarylethanes. Part XI, rearrangement reactions of 1,1-di-*p*-alkoxyphenyl-2,2-dihalogenoethanes in boiling ethylene glycol alone or in the presence of sodium 2-hydroxyethoxide, 373.

Relative reactivities of α-substituted benzyl methyl ethers towards atomic bromine and the trichloromethyl radical, 932.

Resolution of 4-dimethylaminobenzoin, 801.

Steric influences in radical reactions. Part II, the abstraction of benzylic hydrogen atoms from 1-phenylphthalan,

Aromatic (*contd.*)
1,3-diphenylphthalan, and 2-formyl-2′-methylbiphenyl by t-butoxy-radicals, 929.
Studies on the possible interconversion of phenylhydrazones and phenylazoalkanes. Part III, adipaldehyde bisphenylhydrazone, 1989.
Studies on the reaction of benzoyl peroxide with *NN*-dialkyl aromatic amines and other related compounds. Part I, the formation of *N*-*p*-dimethylaminobenzyl-*N*-methylaniline from *NN*-dimethylaniline, 1605.
Substitution reactions of 3,3′-dimethoxybiphenyl, 1050.
Sulphonhydrazides and related compounds. Part VI, some halogeno- and nitro-benzenesulphonhydrazides, 1229.
The chemotherapy of schistosomiasis. Part VII, 2-methyl- and 2-(substituted methyl)-4-aminophenyl ethers, 873. Part VIII, 2-carboxy- and 2-carbamoyl-4-aminophenyl ethers, 2196.
The masking of carbonyl groups by 1,2-dimethyl-4,5-di(mercaptomethyl)benzene, 1005.
The reaction of benzene with aluminium chloride, 2043.
The reaction of benzyl and phenyl radicals with indene, 2019.
The reaction of 2,4-dinitrofluorobenzene with phosphoro- and phosphono-thiolates, 1410.

Aromatic systems, novel. Part II, reactions of some tropylphenols, 926. Part III, some aspects of the chemistry of 1,2-benzocyclo-octen-3-one, 985. Part IV, synthesis and dehydrogenation of 4′-hydroxy-1,2-benzocycloheptatrienes, 990.

Arylaminodecarbonylation, aromatic, 52.

D-Aspartic acid, *N*-benzyl-, an asymmetric synthesis of, 1200.

Aspergillus viridinutans a metabolite, 4-acetyl-6,8-dihydroxy-5-methyl-2-benzopyran-1-one, 126.

Aspidosperma species, four heptacyclic alkaloids from, 1260.

Asymmetric syntheses. Part I, the reduction of ketones with lithium aluminium hydride complexes, 1822. Part II, the reduction of ketones with the lithium aluminium hydride–3-*O*-benzyl-1,2-*O*-cyclohexylidene-α-D-glucofuranose complex, 2280.

(±)-Atractylon, total synthesis of. Studies on sesquiterpenoids. Part XIV, 1866.

Aurofusarin, a metabolite of some *Fusarium* species, the structure of. Studies in mycological chemistry. Part XXI, 2234.
The chemistry of fungi. Part LVI, 2237.

Averantin, " product B ", [1,3,6,8-tetrahydroxy-2-(1-hydroxyhexyl)anthraquinone], a pigment from *Aspergillus versicolor* (Vuillemin) Tiraboschi. Studies in mycological chemistry. Part XIX, 855.

Averythrin, tetra-*O*-methyldihydro-, synthesis. Studies in mycological chemistry. Part XVIII, 160.

Azaphenanthrenes, by photocyclisation of stilbazoles. Studies in photochemistry. Part II, 1078.

Azepine, *N*-methyl-, preparation and properties of some derivatives of, 1950.

3*H*-Azepine-3,6-dicarboxylate, dimethyl 2,7-dimethyl-, rearrangement reactions of, 1075.

Azide chemistry, studies in. Part I, synthesis of perfluoropropenyl azide and its conversion into perfluoro-(2- and 3-methyl-2*H*-azirine), 2304.

Azoacetates, reactions with base. Reactions of lead tetraacetate. Part VIII, 1781.

Azomethines. Part III. Optical rotatory dispersion. Part XXXVIII, configurational assignment in the α-amino-acid series using *N*-alkylidene derivatives, 2047.

Azulen-5-one, α-halogenoperhydro-3,8-dimethyl-. Studies on seven-membered-ring derivatives. Part V, 2095.

B

Benzacridine and **benzocarbazole** analogues having an α-pyrone ring. Carcinogenic nitrogen compounds. Part XLIX, 50.

Benzacridines and acridines with fluoro- and trifluoromethyl-substituents. Carcinogenic nitrogen compounds. Part L, 87.
meso-substituted, some limitations to the Bernthsen synthesis of. Carcinogenic nitrogen compounds. Part LIV, 1792.

Benzaldehyde, *o*-nitro-, condensation with 2,3-dihydro-2-oxoimidazo[1,2-*a*]pyridine, 1095.

Benzene, reaction with aluminium chloride, 2043.
1,2-dimethyl-4,5-di(mercaptomethyl)-, masking of carbonyl groups by, 1005.
2,4-dinitrofluoro-, reaction with phosphoro- and phosphono-thiolates, 1410.
nitroso-, derivatives: nuclear magnetic resonance and mass spectra of, 1334.

Benzenedisulphonyl chloride, interaction with aluminium chloride and benzene, 1284.

Benzenes, chlorofluoro-, and chlorofluoropyridines, preparation by halogen exchange with fused salts, 2142.
polyfluoro-, reactions of metal cyanides with, 708.

Benzimidazole, 1-(2-aminoethyl)-2-benzyl-, derivatives, analgesically active, some branched-chain analogues of, 1167.

Benzimidazoles, some 2-benzyl-5-nitro-, 1511.

5,6-Benzindole-3-acetic acid and **2-(5,6-benzindol-3-yl)-ethylamine,** the synthesis of, 477.

Benzo[*c*]cinnolines, bromo-, and their oxides, ultraviolet absorption of. Polycyclic cinnoline derivatives. Part XVII, 1306.

1,2-Benzocycloheptatrienes, 4′-hydroxy-, synthesis and dehydrogenation of. Novel aromatic systems. Part IV, 990.

1,2-Benzocycloheptene-3,7-dione, 3′,6′-dihydroxy-, the reduction of, 1889.

1,2-Benzocyclo-octen-3-one, some aspects of the chemistry of. Novel aromatic systems. Part III, 985.

1,4-Benzodiazepines and quinazolines. Part XXIX, synthesis of some 2,3-dihydro-5-pyridyl-1*H*-1,4-benzodiazepines, 1031.

Benzofuroxans, 5-amino- and 5-hydroxy-. *N*-Oxides and related compounds. Part XXVIII, 971.

Benzoic acids, *o*-phenoxy-, oxidation of. Persulphate oxidation of carboxylic acids. Part II, 321.

Benzoin, 4-methoxy-, resolution of, 97.
4-dimethylamino-, resolution of, 801.

Benzoins, hydro-, from the reduction of benzaldehyde derivatives. Electrochemical reactions. Part I, 653.

Benzo[*a*]naphtho[1,2-*j*]fluoranthene. Fluoranthenes by cyclodehydrogenation, 2252.

2-Benzopyran-1-one, 4-acetyl-6,8-dihydroxy-5-methyl-, a metabolite of *Aspergillus viridinutans*, 126.

Benzoquinones, 2-hydroxy-, reaction with alkaline hydrogen peroxide. The chemistry of hydroxyquinones. Part I, 2308.

2,1,3-Benzothiadiazole and **2,1,3-benzoselenadiazole,** studies in the quaternisation of. Part II, the preparation of higher alkyl quaternary salts, 1568.

2,1,3-Benzothiadiazoles, the formation of: the action of sulphur monochloride on *o*-nitroanilines and *o*-phenylenediamines, 1283.

[1]Benzothiopyrano[4,3-*b*]indoles and **[1]benzopyrano[4,3-*b*]indoles** and related *pseudo*-azulenes. Carcinogenic nitrogen compounds. Part LII, 1787.

1,4-Benzoxazepin-5(4*H*)-ones, 2,3-dihydro-, the synthesis and proton magnetic resonance spectra of, 969.

6,7-Benzotropolone methyl ether, 4′5′-dimethoxy-, and its photo-oxidation. Photochemical transformations of tropolones. Part II, 2072.

Betaines, $R_3\overset{+}{P}CH_2{\cdot}\overset{-}{C}H(O){\cdot}R$, abnormal reactions of, 887.

Bicyclo[3,3,0]oct-7-en-1-one, oxidative transformations of, 1479.

Biladienes-ac, 1,19-dideoxy-, the base-catalysed cyclisations of, 880.

Bile pigments, the chemistry of the. Part VI, the effect of metal complex formation upon optical activity and spectral absorption of urobilins, 1321.

Biphenyl, 3,3′-dimethoxy-, substitution reactions of, 1050.

Biphenylenes. Part XIV, synthesis of 1- and 2-phenyl-, 2,7-dimethyl-, and 2,3,6,7-tetramethyl-biphenylene, 1767. Part XV, 3,7-dimethyl- and 3,7-dimethoxy-1,5-dinitrobiphenylene, 1769.

Bipyridylium salts, ^{14}C-labelled, the synthesis of, 1468.

2,2-Bithienyl, 5-(but-3-en-1-ynyl)-, and related compounds, synthesis by Grignard coupling, 89.

Boron. Organoboron compounds. Part VI, photochemical reactions of aryl and alkyl halides with boron halides, 566.

Boroxines, trialkyl-, the autoxidation of some. Peroxides of elements other than carbon. Part XI, 1493.

Butyl ethers and alcohols, further results with. Isomerisation accompanying Friedel–Crafts alkylation, 712.

Buxus alkaloids. Part VII, the isolation and constitutions of ten new alkaloids from the weak-base fractions of two species, *B. microphylla* Sieb. *et* Zucc. *var. suffruticosa* Makino and *B. microphylla* Sieb. *et* Zucc. *var. suffruticosa* Makino *forma major* Makino, 1412. Part VIII, the isolation and constitution of a new alkaloid, cyclokoreanine-*B*, from *B. koreana* Nakai, and the conversion of cyclomikuranine into cyclovirobuxine-*A*, 1805.

C

Calcium. Organometallic compounds of Group II. Part VI, 1,2-acenaphthenylenecalcium, 154.

***Calophyllum sclerophyllum* Vesq.,** extractives of. Extractives from Guttiferae. Part I, 178.

Carbamates, *N*-hydroxy-, synthesis and some reactions of, 346.

Carbazoles, *N*-alkyl-, dealkylation of; synthetic applications. Carcinogenic nitrogen compounds. Part LI, 924.

Carbohydrate derivatives, oxidation of, with ruthenium tetroxide, 1131.

nitrogen-containing. Part X, rearrangement of methyl 4,6-*O*-benzylidene-3-deoxy-3-phenylazoaldohexopyranosides with alkali: a route to hexosid-3-uloses, 695. Part XI, reduction of methyl 4,6-*O*-benzylidene-α-D-hexosid-3-ulose phenylhydrazones, 1508.

Carbohydrates, fluoro-. Part XI, formation of a *cis*-addition product in the bromofluorination of tri-*O*-acetyl-D-galactal, 910. Part XII, synthesis of *cis*-iodoglycosyl fluorides by iodofluorination of acetylated glycals, 912. Part XIII, synthesis of 2-deoxy-2-fluoro-(±)-glyceraldehyde 3-*O*-phosphate, 1281. Part XIV, reaction of *N*-(2-chloro-1,1,2-trifluoroethyl)diethylamine with some *O*-isopropylidene sugars, 1994.

unsaturated. Part IV, allylic rearrangement reactions of 3,4,6-tri-*O*-acetyl-D-galactal, 441. Part V, displacements of 4- and 6-sulphonyloxy-groups from methyl 2,3-didehydro-2,3-dideoxyhexopyranoside derivatives, 446. Part VI, a modified synthesis of 2-hydroxyglycal esters and their conversion into esters of 2,3-didehydro-3-deoxyaldoses, 2339. Part VII, the preference shown by allylic ester groupings on pyranoid rings for the *quasi*-axial orientation, 2345.

A method for locating the *O*-acetyl groups in secondary cellulose acetates, 1700.

A synthesis of L-*ribo*-2-amino-1,3,4-trihydroxyeicosane from D-galactose, 1879.

A synthesis of phytosphingosines from D-galactose, 1876.

A synthesis of phytosphingosines from D-glucosamine, 1872.

Chemical transformations of αα-trehalose, 1072.

Formation of ethyl 1,5-dideoxy-5-ethylthio-1-mercapto-α- and -β-L-arabinofuranosides by an intramolecular displacement of 5-*O*-toluene-*p*-sulphonyl-L-arabinose diethyl dithioacetal, 2366.

Polysaccharides of soy-beans. Part II, fractionation of hull cell-wall polysaccharides and the structure of a xylan, 1945.

Preparation and derivatives of poly-(6-*O*-methacryloyl-D-galactose) and poly-(6-*O*-acryloyl-D-galactose), 1913.

Properties of periodate-oxidised polysaccharides. Part VII, the structure of nitrogen-containing derivatives as deduced from a study of monosaccharide analogues, 2121.

Spectrophotometric microdeterminations of aldoses with *p*-aminobenzoic acid, 1638.

Studies on dextrans and dextranases. Part VI, type and degree of branching in two dextrans, 816. Part VII, structure of oligosaccharides from an α-1 ⟶ 4-branched dextran, 821. Part VIII, size and distribution of branches in some dextrans, 827.

Studies on uronic acid materials. Part XVII, some structural features of *Acacia senegal* gum (gum Arabic), 1959.

Syntheses of 4-acetamido-4,5-dideoxy-D-xylofuranose and 5-acetamido-5,6-dideoxy-L-talofuranose, 1724.

The allyl ether as a protecting group in carbohydrate chemistry, 82.

The hemicelluloses of lucerne, 2133.

The hydroxylation of some 2,3-unsaturated glycopyranosides, 1978.

The methyl 2,3-anhydrolyxopyranosides and 3,4-anhydroarabinopyranosides, 1926.

The preparation of 2-deoxy-D-[1-^{14}C]ribose, 704.

The pyrolysis of some hexoses and derived di-, tri- and poly-saccharides, 1473.

Thio-sugars. Part I, the thiopyranose ring, 1287. Part II, the thiofuranose ring, 1291.

β-Carboline, 3,4-dihydro-, and 2-alkyltryptamines, a synthesis of, 425.

Carbonyl groups, masking of, by 1,2-dimethyl-4,5-di(mercaptomethyl)benzene, 1005.

Carotenoids and related compounds. Part XIV, stereochemistry and synthesis of geraniol, nerol, farnesol, and phytol, 2144. Part XV, synthesis of phytoene, phytofluene, ζ-carotene, and neurosporene, 2154. Part XVI, structural and synthetic studies on spirilloxanthin, chloroxanthin, spheroidene, and spheroidenone, 2166.

Caryophyllene derivatives, absolute configuration of some, 247.

Catalytic hydrogenation with a soluble catalyst. Some aspects of, 1894.

Catechin series, a novel rearrangement in, 634.

Catechol, 4-amino-, and 4-aminoresorcinol, ethers of. The chemotherapy of schistosomiasis. Part VI, 366.

Cedrela odorata substance " B ", and khayasin, some reactions of. West African timbers. Part XVIII, 2127.

Cellulose acetates, secondary, a method for locating the *O*-acetyl groups in, 1700.

Cephalosporanic acids. Part IV, 7-acylamidoceph-2-em-4-carboxylic acids, 1142.

Chloramphenicol, synthesis of a silicon-containing analogue of, 249.

Chloroxanthin, spirilloxanthin, spheroidene, and spheroidenone, structural and synthetic studies on. Carotenoids and related compounds. Part XVI, 2166.

5α-Cholestane, 3β- and 3α-amino-, the deamination of. Steroids and Walden inversion. Part LVIII, 1018.

Cholestane-4,7-diyl diacetate, 5α-hydroxy-, the Westphalen-type rearrangement of, 1010.

5α- and 5β-Cholestan-6-ones, 3β-substituted, equilibration of. Conformational free energy differences in steroids. Part I, 846.

5α-Cholestan-2β-yl, 3α-iodo-, trifluoroacetate, the preparation and reactions of. Hydroxy-steroids. Part VII, 1331.

Cholestan-6β-yl nitrate 3β-acetoxy-5α-chloro-, thermal rearrangement and other reactions of, 2261.

Cholest-4-en-7β-ol, the hydroxylation of, 1012.

4-Chromanones, reaction of aromatic aldehydes and nitroso-compounds with, 711.

Chromens and naphthopyrans, reaction with bromine and chlorine. Part IV, 2013.

Chrysanthemum cinerariaefolium **VIS.,** new insecticidally active constituents, the jasmolins, 332.

Chrysoaphin chromophore, synthesis of, and reconstruction of the protoaphins. A coupling reaction involving phenols and quinones. Colouring matters of the Aphididae. Part XXVIII, 1825.

Cinnoline derivatives, polycyclic. Part XVII, ultraviolet absorption of bromobenzo[*c*]cinnolines and their oxides. 1306.

Cinnolines. Part VIII, methylation of some substituted cinnolines, 470.

Circular dichroism of *N*-thiobenzoyl-L-α-amino-acids. Part II, further examples of solvent-dependent circular dichroism, 1771.

Cissampelos pareira **L.,** (++)-4″-*O*-methylcurine from, 615.

D-Cladinose and D-mycarose, synthesis of. Branched-chain sugars. Part VII, 398.

Clemmensen reduction. Part III, αβ-unsaturated ketones, 2006.

Colletotrichin, acetyl-, and **colletodiol,** isolation and characterisation. Metabolic products of *Colletotrichum capsici*, 230.

Colombo root bitter principles, the stereochemistry of, 1482.

Colophospermum mopane, stereochemistry and biogenesis of mopanols and peltogynols and associated flavanoids from, 1644.

Combretol from *Combretum quadrangulare*, 125.

Complexes and metal ions in organic reactions. Part VI, a comparison of oxidants for 2,6-dimethylphenol, 791.

Computer programme to aid in the determination of molecular formulæ, 906.

Coreximine and related compounds. Part IV, a total synthesis of (±)-coreximine, 2010.

(+)- and(−)-Coreximine, and (+)- and (−)-scoulerine, synthesis of, 1052.

Corpaverine, the structure of. Studies on the syntheses of heterocyclic compounds. Part CXXXV, 715.

Corydine, orientalinone, and isocorytuberine, synthesis of. Phenol oxidation. Part II, 2222.

Coumarins and pyronocoumarins. Aspects of mass spectra of organic compounds. Part I, 1712.

The structure of robustic acid, a new 4-hydroxy-3-phenylcoumarin, 606.

***p*-Cresol,** condensation with carbon tetrachloride, 1519.

Croton species, alkaloids from. Part III, the constitution of the proaporphines crotonosine, " homolinearisine ", base A, and the dihydroproaporphine linearisine, 1676. Part IV, the isolation and structure of a new proaporphine derivative from *Croton linearis* Jacq., 1680. Part V, configuration of linearisine and circular dichroism of proaporphine-type alkaloids, 1681.

Curine. (++)-4″-*O*-Methylcurine from *Cissampelos pareira* L., 615.

Cyanuric acid, trithio-, methyl derivatives of, 909.

Cyclitols. Part XXII, synthesis of some mannosyl- and mannosylmannosyl-myoinositols, and of galactinol, 433. Part XXIII, suppression of epoxide migration. Synthesis of mucoinositol, 798.

Cycloaddition reactions, 1,3-dipolar, of diazoalkanes. Part I, kinetics and mechanism of the reactions between diazomethane or diazoethane and methyl acrylate or methyl methacrylate, 1408.

Cycloalkadienes, nonconjugated, *cis–trans* equilibria in. Macrocyclic compounds. Part XII, 264.

Cyclobutane derivatives, some alleged, 1026.

Cyclobutanes, alkylidene-. Part II, the oxidation of benzylidenecyclobutane and of bis-(*p*-methoxyphenyl)methylenecyclobutane, 655.

Cyclohexadienes, reactions of. Part V, a new synthesis of 4-substituted cyclohexenones, 419. Part VI, further reactions of Diels–Alder adducts from 1-methoxycyclohexadienes, 2324.

Cyclohexanecarboxylic acid, 2-ethynyl-2-hydroxy-1,3-dimethyl-, reactions of, 764.

Cyclohexanes, *cis–trans* substituted, the physical properties of some. The chemistry of terpenes. Part II, 946.

Cyclohexanols, 2-t-butyl-, the absolute configuration of, 1988.

Cyclohexanone, (±)-5-ethyl-2,5-dimethyl-, the synthesis of. The chemistry of fungi. Part LIV, 627.

2-methyl-2-(4-methyl-3-oxopentyl)-, cyclisation of, 224.

Cyclohex-2-ene-1,4-dione, (+)-*trans*-2,3-dimethoxy-5,6-dimethyl-, gliorosein, 985.

Cyclohexylacetic acids, 2,6-dioxo-, cyclisation and *C*-acylation of, 2100.

Cyclopentadienes, fulvenes, and fulvalenes. Part IV, 1,2-diphenylcyclopentadienes, 306.

polyfluoro-. Part II, the thermal dimer of perfluorocyclo-

Cyclopentadienes (*contd.*)
pentadiene: perfluoro(tricyclo[5,2,1,$0^{2,6}$]deca-3,8-diene), 2102.
triphenyldiazo- and tetraphenyldiazo-, 408.
Cyclopentadienide, tetracyano-, anion and its electrophilic aromatic substitution, 1641.
Cyclopentanecarboxylic acid, 1-amino-2-nitro-. A new naturally-occurring nitro-compound, 255.
Cyclopentane-1,3-dione, 2-methyl-, some alkylations of, 1973.
Cyclopenta[*a*]phenanthrenes (1,2-cyclopentenophenanthrenes), potentially carcinogenic. Part I, a new synthesis of 15,16-dihydro-17-oxocyclopenta[*a*]phenanthrene and the phenanthrene analogue of 18-norœstrone methyl ether, 955. Part II, derivatives containing further unsaturation in ring D, 963.
Cyclopenta[*b*]pyran, 2,4,5,6-tetraphenyl-, the chemistry of. Pseudoazulenes. Part V, 859.
Cyclopenta[*c*]quinolizines, formation from 3-α-dimethylaminovinylindolizines and dimethyl acetylenedicarboxylate. Heterocyclic compounds with bridgehead nitrogen atoms. Part III, 324.
1*H*-Cyclopropa[*a*]naphthalene, 1a,2,3,7b-tetrahydro-1-phenyl-, a simple synthesis of, 1004.
L-Cysteine, addition to unsaturated lactones and related compounds, 1123.
Cysteine, dehydrogenation of some thiazolines derived from. Peptides. Part XXI, 1061.
Cytidine, methylated, mono- and pyro-phosphates, the synthesis of some, 588.
Cytotoxic compounds. Part VII, α-aryl-α-halogenoacetophenones, their enol acetates, and some related compounds, 533. Part VIII, some *S*-α-(acylamino)acyl-*p*-[di-(2-halogenoethyl)amino]thiophenols, 540.

D

***Datura sanguinea* R. and P.,** new alkaloids of. The alkaloids of the genus *Datura*, section Brugmansia. Part IV, 1621.
Deoxyribonucleic acid, the action of iodine on, 1635.
Derris scandens, extractives from. Part I, the structures of scandenin and lonchocarpic acid, 192. Part II, the isolation of osajin and two new isoflavones, scandenone and scandinone, 701.
Dextrans and dextranases, studies on. Part VI, type and branching in two dextrans, 816. Part VII, structures of oligosaccharides from an α-1 ⟶ 4-branched dextran, 821. Part VIII, size and distribution of branches in some dextrans, 827.
1,8-Diazacyclotetradecane, 1,8-dihydroxy-, the crystal structure of. Aliphatic hydroxylamines. Part V, 1108.
1,3-Diaza-1,3-dihydro-2-phospholo[4,5-*d*]pyrimidine 2-oxides, synthesis and properties of, 1242.
Diazepines. Part IV, dihydrodiazepinium salts from the condensation reaction between *NN'*-disubstituted ethylenediamines and β-dicarbonyl compounds, 93. Part V, 2,3-dihydro-1*H*-1,4-diazepines, 780.
Diazo-compounds, secondary aliphatic, preparation from hydrazones, 467.
Dibenzacridines and **dibenzocarbazoles,** thiazole isosteres of. Carcinogenic nitrogen compounds. Part LIII, 1792.
Dibenz[*a,kl*]anthracene-13-carboxylic acid, 7-oxo-, optically active; and its methyl ester, 1315.
Dibenzo[*c,h*]cinnoline oxides, 890.
Dibenzo[*b,mno*]fluoranthene, 674.
Dibenzofurans, potentially chemotherapeutic, 504.
Dicyandiamide, benzoyl-, [PhCO·NH·C(NH$_2$):N·CN], reaction with hydroxylamine hydrochloride, to give oxadiazoles, 1522.
Dieldrin, some reactions of, and the proton magnetic resonance spectra of the products, 2026.
Diethylenetriamine and ethylenediamine, *N*-allyl derivatives, syntheses and properties of, 203.
Dimroth rearrangement. Part VI, the abnormal behaviour of 5-cyano-1,2-dihydro-2-imino-1-methylpyrimidine, 164. Part VII, measurement of equilibria in reversible examples from the pyrimidine series, 1165.
Dinaphthophenazinediquinones, dihydro-, the reduction of. Chemistry of indanthrone. Part XI, 2081.
and their *NN'*-dihydro-derivatives, some properties of. Chemistry of indanthrone. Part XII, 2090.
Dinaphthro[2,3-*b*; 2',3'-*i*]phenazine-5,9,14,18-diquinone, dihydro-: a linear isomer of indanthrone. Chemistry of indanthrone. Part X, 277.
1,3,2-Dioxaphospholans. Cyclic organophosphorus compounds as possible pesticides. Part I, 1997.
1,3,2-Dioxaphosphorinans. Cyclic organophosphorus compounds as possible pesticides. Part II, 2001.
1,3-Dioxolan, 2,4-disubstituted derivatives, configuration of. Aspects of stereochemistry. Part XXIII, 208.
Dithiobiurets, 1,1-dialkyl-, preparation of, 2069.
1,3-Dithiolans, reductive fission of, by sodium in liquid ammonia, 415.

E

Echimidinic acid, the biosynthesis of. Pyrrolizidine alkaloids, 1968.
Eicosane, L-*ribo*-2-amino-1,3,4-trihydroxy-, a synthesis of, from D-galactose, 1879.
Electrochemical reactions. Part I, the stereochemistry of some hydrobenzoins from the reduction of benzaldehyde derivatives, 653.
Electrolysis of ethyl sodioacetoacetate in ethanolic systems. Anodic oxidation. Part I, 336.
Enol elimination reactions. Part III, the scope and limitations of eliminations involving enol sulphonates, 1390.
Epistephanine, the biosynthesis of, and the structure of stebisimine. Phenol oxidation and biosynthesis. Part XI, 2313.
Erythritol, 2,3-*O*-benzylidene-, acid-catalysed rearrangement of. Aspects of stereochemistry. Part XXIV, 212.
Erythroaphin and related systems, partial synthesis of, by oxidative coupling. Colouring matters of the Aphididae. Part XXIX, 1832.
D-Erythrose, 2,4-*O*-benzylidene-, acid-catalysed rearrangement of. Aspects of stereochemistry. Part XXIV, 212.
Erythroxydiols X, Y, and Z; two novel skeletal types of diterpenoids. Constituents of *Erythroxylon monogynum* Roxb. Part II, 268.
Esters, carboxylic, alkyl–oxygen fission in. Part XVII, influence of the methoxyl and ethoxyl groups on the reactivity of 1-(1-naphthyl)ethanol and 1-(2-naphthyl)-ethanol, 1185.
Ethane, [$^2H_6$]- and [$^3H_6$]bromo-, and [$^3H_8$]propane, preparation of, 942.

Ethanol, 1-(1-naphthyl)- and 1-(2-naphthyl)-, influence of the methoxyl and ethoxyl groups on the reactivity of. Alkyl–oxygen fission in carboxylic esters. Part XVII, 1185.

Ethers, benzhydryl methyl, and ethylbenzenes, nuclear-substituted; hydrogen abstraction from, by atomic bromine. Polar influences in radical reactions. Part V, 935.

α-substituted benzyl methyl, relative reactivities towards atomic bromine and the trichloromethyl radical, 932.

Ethylene carbonates, reaction with nucleophilic reagents. Organic fluorine compounds. Part XXXV, 899.

Ethylenediamine and diethylenetriamine, *N*-allyl derivatives, syntheses and properties of, 203.

F

Falcarinone, a C_{18} polyacetylenic keto-aldehyde related to: from an Umbellifer (*Pastinaca sativa* L.). Natural acetylenes. Part XXIII, 1220.

Farnesol, geraniol, nerol, and phytol, stereochemistry and synthesis of. Carotenoids and related compounds. Part XIV, 2144.

Ferrocene derivatives. Part XV, new routes to symmetrically disubstituted ferrocenes, 251.

***Ficus carica* L.,** constituents of leaves of. Part II, isolation of a ψ-taraxasteryl ester, rutin, and a new steroid sapogenin, 1140.

Flavonoids. Stereochemistry and biogenesis of mopanols and peltogynols and associated flavonoids from *Colophospermum mopane*, 1644.

Fluoranthenes by cyclodehydrogenation. Benzo[*a*]naphtho-[1,2-*j*]fluoranthene, 2252.

Fluorene, 1-methyl- and 2-methoxy-, some substitution reactions of, 481.

9-phenethyl-, and its dehydro-derivatives, 1810.

Fluorine compounds, organic. Part XXXV, the reaction of ethylene carbonates with nucleophilic reagents, 899.

Aromatic polyfluoro-compounds. Part XXXI, the synthesis and reactions of some halogenomethylpentafluorophenylmethanols and routes to pentafluorophenylacetylenes, 597. Part XXXIII, the synthesis of some derivatives of 1,2,3,4-tetrafluoroacridine, 2020. Part XXXVII, nitration of some polyfluoro-benzenes and -biphenyls, 2323.

Organophosphorus chemistry. Part V, preparation of pentafluorophenylphosphorus chlorides and their reactions with amines, 1592.

Perfluoroalkyl derivatives of nitrogen. Part XXI, some reactions of bistrifluoromethylnitroxide, 901. Part XXII, the reaction of nitric oxide with hexafluoropropene, 1232. Part XXIII, the photochemical decomposition of tristrifluoromethylhydroxylamine, 1236. Part XXIV, perfluoroalkylnitroso-compounds from perfluoroacyl nitrites, 1350.

Perfluoroalkyl derivatives of sulphur. Part VIII, synthesis and reactions of perfluoroethylenesulphonyl fluoride, 1171.

Polyfluorocyclopentadienes. Part II, the thermal dimer of perfluorocyclopentadiene: perfluoro(tricyclo-[5,2,1,$0^{2,6}$]deca-3,8-diene), 2102.

Polyfluoroheterocyclic compounds. Part VII, heptafluoro-quinoline and -isoquinoline, 2328. Part VIII, nucleophilic substitution in heptafluoro-quinoline and -isoquinoline, 2331.

Polyhalogenoallenes. Part III, isomerisation of the dimer of tetrafluoroallene, perfluoro-(1,2-dimethylenecyclobutane), to perfluoro-(2-methyl-3-methylenecyclobutene), 981. Part IV, thermal co-dimerisation of tetrafluoroallene with hexafluorobut-2-yne, 2051.

Reactions of metal fluorides with polyfluorobenzenes, 708.

Studies in azide chemistry. Part I, synthesis of perfluoropropenyl azide and its conversion into perfluoro-(2- and 3-methyl-2*H*-azirine), 2304.

Fluorocarbohydrates. Part XI, formation of a *cis*-addition product in the bromofluorination of tri-*O*-acetyl-D-galactal, 910. Part XII, synthesis of *cis*-iodoglycosyl fluorides by iodofluorination of acetylated glycals, 912. Part XIII, synthesis of 2-deoxy-2-fluoro-(±)-glyceraldehyde 3-*O*-phosphate, 1281. Part XIV, reaction of *N*-(2-chloro-1,1,2-trifluoroethyl)diethylamine with some *O*-isopropylidene sugars, 1994.

***N*-Fluoro-compounds.** Part I, synthesis of *N*-fluoro-compounds by direct fluorination of aqueous substrates, 1514.

Folicanthine, the biosynthesis of, 1570.

Free-radical addition reactions, synthetic aspects of. Part V, alkylation of compounds containing activated methylene and methine groups, 1743.

Friedel–Crafts acetylation of 2-bromonaphthalene, a re-examination of, 518.

alkylation, isomerisation accompanying. Part II, further results with butyl ethers and alcohols, 712.

Fungal detoxication. Part VIII, metabolism of substituted 4-phenoxybutyric acids by *Aspergillus niger*, 884.

Fungal metabolites. Part VI, the structure of verrucarin A: *X*-ray analysis of verrucarin A *p*-iodobenzenesulphonate, 1394. Part VII, stereochemistry of gibberellic acid: *X*-ray analysis of methyl bromogibberellate, 1577.

Fungi, chemistry of. Part III, constituents of *Coriolus sanguineus* Fr., 72.

the chemistry of. Part LIII, [optical rotatory dispersion studies. Part CV.] The absolute configuration of rosenono- and rosolo-lactone, 624. Part LIV, the synthesis of (±)-5-ethyl-2,5-dimethylcyclohexanone and of (±)-3-ethyl-3-methyl-6-oxoheptanoic acid, 627. Part LV, [optical rotatory dispersion. Part XXX.] The optical rotatory dispersion of rosenonolactone and related compounds, 896. Part LVI, aurofusarin, 2237.

Natural acetylenes. Part XXII, *trans*-dehydromatricaria ester as a biosynthetic precursor of some fungal polyacetylenes, 1216.

Furan chemistry, studies in. Part IV, 2,2′-bifurans, 976.

compounds, new method for the synthesis of, 377.

Furans and alk-2-en-4-yn-1-ols from alkali-metal acetylides and epichlorohydrin, 2283.

Furo[2,3-*b*]benzofuran, (±)-tetrahydro-4-hydroxy-6-methoxy-, a racemic form of a laevorotatory degradation product of dihydrosterigmatocystin, synthesis of. Studies in mycological chemistry. Part XX, 1308.

Fusarium equiseti, phytotoxic compounds produced by. Part II, the chemistry of diacetoxyscirpenol, 116.

G

D-Galactal, tri-*O*-acetyl-, formation of a *cis*-addition product in the bromofluorination of. Fluorocarbohydrates. Part XI, 910.

3,4,6-tri-*O*-acetyl-, allylic rearrangement reactions of. Unsaturated carbohydrates. Part IV, 441.

Galactinol, and mannosyl- and mannosylmannosyl-myoinositol, synthesis of. Cyclitols. Part XXII, 433.
Galanthine, the biosynthesis of. Phenol oxidation and biosynthesis. Part IX, 676.
Gallotannins. Part XIII, the structure of Chinese gallotannin: evidence for a polygallol chain, 783.
Gamboge. Part II, 772.
Gastrin. Polypeptides. Part III, the synthesis of the *C*-terminal tetrapeptide sequence of gastrin, its optical isomers, and acylated derivatives, 555.
Gedunin, correlation with methyl angolensate and andirobin. West African timbers. Part XVII, 944.
and khivorin, inter-relation of. West African timbers. Part XII, 506.
Geraniol, nerol, farnesol, and phytol, synthesis and stereochemistry. Carotenoids and related compounds. Part XIV, 2144.
Gibberella fujikuroi, new metabolites of. Part XI, gibberellin A_{14}, 501.
Gibberellic acid, sterochemistry of: *X*-ray analysis of methyl bromogibberellate. Fungal metabolites. Part VII, 1577.
Glaucine and isoboldine, the synthesis of. Phenol oxidation. Part I, 2061.
Gliorosein, the structure of, 985.
Gliotoxin, dehydro-, a metabolite of *Penicillium terlikowskii,* isolation and structure of. Sporidesmins. Part VI, 1799.
Globuxanthone and symphoxanthone, from *Symphonia globulifera* L., the isolation and structure of. Extractives from Guttiferae. Part III, 2186.
Glucitol, furfurylidene derivatives of, 2229.
D-Gluconic acid hydrazide, reaction with carbonyl compounds. Part I, reaction with alicyclic ketones, 312.
Glutamic acid and lysine residues, the synthesis of some oligopeptides containing. Polypeptides. Part XIV, 2349.
Glutaric acids, β-aryl-α-oxo-, 1924.
Glycal, 2-hydroxy-, esters; a modified synthesis and conversion into esters of 2,3-didehydro-3-deoxyaldoses. Unsaturated carbohydrates. Part VI, 2339.
Glycals, acetylated, iodofluorination of. Synthesis of *cis*-iodoglycosyl fluorides. Fluorocarbohydrates. Part XII, 912.
(±)-Glyceraldehyde, 2-deoxy-2-fluoro-, 3-*O*-phosphate, synthesis of. Fluorocarbohydrates. Part XIII, 1281.
Glycerides. Acyl migration in diglycerides, 1710.
Glycolipid from a Pneumococcus, degradation product. Synthesis of *O*-α-D-galactopyranosyl-(1⟶2)-*O*-α-D-glucopyranosyl-(1⟶1)-D-glycerol, 521.
Glycopyranosides, 2,3-unsaturated, the hydroxylation of some, 1978.
β-Glycoside esters, Koenigs–Knorr syntheses with mercuric salts, 530.
***C*-Glycosyl** compounds. Part V, mangiferin; the nuclear magnetic resonance spectra of xanthones, 1685.
Glyoxylic acid, 2,4-dimethoxyphenyl-, and 2,4-dimethoxymandelic acid, derivatives of, 1221.
Grandiflorone, a new β-triketone, the structure of, 1496.
Greenheart, alkaloids from. Part III, the structure of rodiasine. Mass spectra of bisbenzylisoquinoline alkaloids, 1082.
Grignard reagents, formation from 3-bromo-*NN*-dimethylbenzylamine and 4-bromo-*NN*-diethylbenzylamine and their reactions with benzaldehyde, 313.
Guanidine, diamino-. Heterocyclic compounds from urea derivatives. Part IX, addition products of diaminoguanidine and isothiocyanate esters, and their cyclisation. Part X, addition products of isocyanate esters and diaminoguanidine or its hydrazones, and their cyclisation, 1, 6.
Guttiferae, extractives from. Part I, extractives of *Calophyllum sclerophyllum* Vesq., 178. Part II, the isolation and structure of four polyhydroxyxanthones in *Symphonia globulifera* L., 430. Part III, the isolation and structure of symphoxanthone and globuxanthone from *Symphonia globulifera* L., 2186. Part IV, isolation and structure of ugaxanthone and mbarraxanthone from *Symphonia globulifera* L., 2265.

H

Halogen compounds. Preparation of chlorofluorobenzenes and chlorofluoropyridines by halogen exchange with fused salts, 2142.
Reactions of unsaturated acid halides. Part I, aluminium chloride-catalysed reactions of phenylpropioloyl chloride with benzene, 1703.
Trihalogenomethyl compounds of potential therapeutic interest. Part VI, some alcohols with sedative action, and their esters, 670.
Halogen replacements, anomalous. Reactions in *NN*-dimethylformamide solution, 95.
Halogenohydrins in the t-butylcyclohexane and steroid series, the hydrogen-bonding properties of. Structure and biological activity of steroids. Part I, 1902.
Hayatin, the structure of. The high-resolution mass spectra of bisbenzyltetrahydroisoquinoline alkaloids, 1966.
Hemicelluloses of lucerne, 2133.
Heptanoic acid, (±)-3-ethyl-3-methyl-6-oxo-, the synthesis of. The chemistry of fungi. Part LIV, 627.
Heterocycles, phosphorus. Part I, a conjugated cyclic methylenephosphorane, 2003.
A new synthesis of heterocyclic phosphorus compounds, 245.
A novel cyclodehydration. Thermal conversion of diethyl 2-naphthoxyoxalacetate into diethyl naphtho-[2,1-*b*]furan-1,2-dicarboxylate, 463.
A synthesis of 2-alkyltryptamines and of 3-4-dihydro-β-carboline, 425.
Additions to cyclic nitrones: synthesis of a pyrrolo-[1,2-*b*]-1,2-benzisoxazole, 1338.
Alk-2-en-4-yn-1-ols and furans from alkali–metal acetylides and epichlorohydrin, 2283.
Aromatic polyfluoro-compounds. Part XXXIII, the synthesis of some derivatives of 1,2,3,4-tetrafluoroacridine, 2020.
Aspects of mass spectra of organic compounds. Part I, some coumarins and pyronocoumarins, 1712.
Basic 2-piperidones as potential central nervous system depressants and anticholinergics, 802.
Carcinogenic nitrogen compounds. Part XLIX, analogues of benzacridines and benzocarbazoles having an α-pyrone ring, 50. Part L, acridines and benzacridines with fluoro- and trifluoromethyl-substituents, 87. Part LI, dealkylation of *N*-alkylcarbazoles; synthetic applications, 924. Part LII, [1]benzothiopyrano-[4,3-*b*]indoles, [1]benzopyrano[4,3-*b*]indoles, and related *pseudo*-azulenes, 1787. Part LIII, thiazole

Heterocycles (*contd.*)
isosteres of dibenzacridines and dibenzocarbazoles, 1790. Part LIV, some limitations to the Bernthsen synthesis of *meso*-substituted benzacridines, 1792.
Cephalosporanic acids. Part IV, 7-acylamidoceph-2-em-4-carboxylic acids, 1142.
Chemistry of indanthrone. Part XI, the reduction of the dihydrodinaphthophenazinediquinones, 2081. Part XII, some properties of the dinaphthophenazinediquinones and their *NN'*-dihydro-derivatives, 2090.
Chemistry of micrococcin *P*. Part VII, dimethyl micrococcinate and some synthetic pyridine–polythiazole carboxylic esters, 1354. Part VIII, a method for the degradation of thiazole-4-carboxylic acids, 1357. Part IX, the crystal and molecular structure of micrococcinic acid bis-4-bromoanilide, 1361. Part X, proton magnetic resonance spectrum of dimethyl micrococcinate, and the probable mode of biosynthesis of micrococcinic acid, 1371.
Cinnolines. Part VIII, methylation of some substituted cinnolines, 470.
Condensation reactions of 5-(pyrrol-2-ylmethyl)pyrrolidones and related compounds, 1155.
Condensations of acylpyridines with amines. Part I, 2-Acylpyridines and aminoacetal, 1209.
Cyclic amidines. Part XX, polyaza- and oxapolyazabenzonaphthanthracenes, 1245.
Cyclic nitrones. Part II, the oxidation of cyclic nitrones by iron(III) chloride, 1477.
Cyclic organophosphorus compounds as possible pesticides. Part I, 1,3,2-dioxaphospholans, 1997. Part II, 1,3,2-dioxaphosphorinans, 2001.
Diazepines. Part V, 2,3-dihydro-1*H*-1,4-diazepines, 780.
Dibenzo[*c*,*h*]cinnoline oxides, 890.
Diels–Alder reactions of oxindolylideneacetone, 1028.
Dihydration (covalent) of pyrazine heterocycles, 999.
Dihydropyridines from dimethyl acetylenedicarboxylate and Schiff bases, 1121.
Infrared spectra of hindered 4(1*H*)-quinolones, 2311.
Isatogens. Part IV, 1596.
New derivatives of 3-methylpurine, 10.
Optical rotatory dispersion. Part XXXVI, quaternary compounds of 1-benzyltetrahydroisoquinolines and of aporphines, 1340.
Optically active 7-oxodibenz[*a*,*kl*]anthracene-13-carboxylic acid and its methyl ester, 1315.
N-Oxides and related compounds. Part XXVIII, 5-Amino- and 5-hydroxy-benzofuroxans, 971.
Photochemistry of organic nitrogen compounds. Part II, the photolysis of pyrazolenines *via* diazo-compounds, 1719.
Polycyclic cinnoline derivatives. Part XVII, ultraviolet absorption of bromobenzo[*c*]cinnolines and their oxides, 1306.
Potentially chemotherapeutic dibenzofurans, 504.
Preparation and properties of some substituted quinazolino[3,2-*b*]cinnolines, 2190.
Preparation of chlorofluorobenzenes and chlorofluoropyridines by halogen exchange with fused salts, 2142.
Preparation of indolizines from ethyl bromopyruvate and ethyl 2-pyridylacetate, 2120.
Pseudoazulenes. Part V, the chemistry of 2,4,5,6-tetraphenylcyclopenta[*b*]pyran, 859.
Pteridine studies. Part XXXI, the covalent hydration and subsequent oxidation of 8-methyl derivatives of some amino- and hydroxy-pteridines, 1065. Part XXXII, nucleophilic addition reactions of 2-aminopteridine, 1117.
Purines, pyrimidines, and imidazoles. Part XXV, some chemical reactions and interconversions of intermediates in the sequence of biosynthesis *de novo* of purine nucleotides leading to imidazole nucleotides, 2270.
Pyrazolo-*as*-triazines. Part I, 1127.
Pyrazolo-*as*-triazines. Part II, bromination, 1214.
Quinazolines and 1,4-benzodiazepines. Part XXIX, synthesis of some 2,3-dihydro-5-pyridyl-1*H*-1,4-benzodiazepines, 1031.
Reaction of aromatic aldehydes and nitroso-compounds with 4-chromanones, 711.
Reaction of hydrazine with some fused isoindolobenzoxazines, 573.
Reactions of lead tetra-acetate. Part V, the synthesis of 1-phenylindazole and some derivatives, pyridylindazoles, and thienopyrazoles, 1527. Part VII, some reactions leading to pyrazoles, 1536.
Reactions of methazonic acid. Part V, formation of quinazoline 3-oxides, 1433.
Reaction of some chromens and naphthopyrans with bromine and chlorine. Part IV, 2013.
Rearrangement reactions of dimethyl 2,7-dimethyl-3*H*-azepine-3,6-dicarboxylate, 1075.
Reissert compound studies. Part XIII, model reactions based on 2-benzoyl-1,2-dihydroisoquinaldonitrile, 1860.
Some 2-benzyl-5-nitrobenzimidazoles, 1511.
Some branched-chain analogues of analgesically active 1-(2-aminoethyl)-2-benzylbenzimidazole derivatives, 1167.
Some iodinated pyrazole derivatives, 1179.
Sporidesmins. Part VI, isolation and structure of dehydrogliotoxin, a metabolite of *Penicillium terlikowskii*, 1799. Part VII, oxindoles derived from sporidesmin-B, 1803.
Studies in furan chemistry. Part IV, 2,2'-bifurans, 976.
Studies in the pyrroline series. Part VI, the formulation of the base $C_{13}H_{23}NO_3$ as a 1-pyrroline 1-oxide, 1491.
Studies in the quaternisation of 2,1,3-benzothiadiazole and 2,1,3-benzoselenazole. Part II, the preparation of higher alkyl quaternary salts, 1568.
Synthesis and properties of 1,3-diaza-1,3-dihydro-2-phospholo[4,5-*d*]pyrimidine 2-oxides, 1242.
Synthesis of isoflavones. Part IV, munetone, 749.
Synthesis of 1,3,5,7,9-oxatetrathiacyclodecane and of 1,3,5,7,9,11-oxapentathiacyclododecane, 428.
Tautomerism of 3-alkoxycarbonylmethylene-2-oxo-1,2,3,4,-tetrahydroquinoxaline derivatives, 806.
2,3,6,7-Tetrahydroimidazo[2,1-*b*]thiazolium bromide and some 2-iminothiazolidine precursors, 1226.
The acid-catalysed rearrangement of tetrahydroquinoline derivatives, 514.
The action of alkali on some purines and their derivatives, 692.
The action of alkali on some pyrimidines and their derivatives, 1784.
The action of sulphur monochloride on *o*-nitroanilines and *o*-phenylenediamines: the formation of 2,1,3-benzothiadiazoles, 1283.
The attempted synthesis of nitrogen-containing analogues of [10]paracyclophane, 334.
The chemistry of polyazaheterocyclic compounds. Part

Heterocycles (*contd.*)
I, the structure and reactivity of the 1,2,3-triazolo-[1,5-*a*]quinazoline ring system, 2290.
The condensation of 2,3-dihydro-2-oxoimidazo[1,2-*a*]-pyridine with *o*-nitrobenzaldehyde, 1095.
The Dimroth rearrangement. Part VII, measurement of equilibria in reversible examples from the pyrimidine series, 1165.
The formation, ionisation, and spectra of some alkylamino-pteridines, -purines, and -pyrimidines, 226.
The photochemistry of 1-methylthymine and 3-methyl-thymine, 1342.
The preparation and properties of some derivatives of *N*-methylazepine, 1950.
The preparation of some 4-substituted nicotinic acids and nicotinamides, 1816.
The reaction of benzoyldicyandiamide [PhCO·NH·C(NH$_2$):N·CN] with hydroxylamine hydrochloride, to give oxadiazoles, 1522.
The reactions of 2-alkyl- and 2-aryl-indoles with azides, 1345.
The reactions of thiourea with some chloropyrazines and their *N*-oxides, 495.
The reductive alkylation of isoquinoline, 2140.
The structure of thymine photo-dimer, 2239.
The synthesis and proton magnetic resonance spectra of 2,3-dihydro-1,4-benzoxazepin-5(4*H*)-ones, 969.
The synthesis of 5,6-benzindole-3-acetic acid and 2-(5,6-benzindol-3-yl)ethylamine, 477.
The synthesis of ^{14}C-labelled bipyridylium salts, 1468.
The synthesis of 1,2,3,4,6,10b-hexahydropyrido[2,1-*a*]-isoindole, 2016.
The synthesis of pyrrolo[1,2-*a*]quinoxalines from *N*-(2-acylaminophenyl)pyrroles, 852.
The synthesis, structure, and reactions of 1,2,3-triphenyl-1,2,3-triphosphaindane, a novel heterocyclic system. A new synthesis of the 5,10-dihydrophosphanthren system, 916.
1,4-Thiazepines and 1,4-thioxans from thiols, 1708.
Triazaphenanthrenes. Part VI, further observations on the Widman–Stoermer and Borsche reactions, 2053.
s-Triazolopyrimidines. Part IV, synthesis as potential therapeutic agents, 2031.
s-Triazolopyrazines, 2038.
5-(*p*-Trimethylsilylbenzyl)pyrimidines, 493.
Triphenyl- and tetraphenyl-cyclopentadienylidene-pyrans and -thiins, 1086.
Heterocyclic compounds, addition reactions of. Part XXV, dimethyl acetylenedicarboxylate with pyridazines and pyrazines, 2218.
from urea derivatives, Part IX, addition products of diaminoguanidine and isothiocyanate esters, and their cyclisation. Part X, addition products of isocyanate esters and diaminoguanidine or its hydrazones, and their cyclisation, 1,6.
partially fluorinated. Part I, the preparation of some tetra- and tri-fluoroquinolines, and some reactions of 5,6,7,8-tetrafluoroquinoline, 215.
polyfluoro-. Part VI, nucleophilic substitution in tetrafluoro-4-nitropyridine, 220. Part VII, heptafluoroquinoline and -isoquinoline, 2328. Part VIII, nucleophilic substitution in heptafluoro-quinoline and -isoquinoline, 2331.
studies of. Part III, a synthesis of 4*H*-indeno[2,1-*d*]-thiazolium salts, 686. Part IV, electrophilic substitution of 6-methylpyrrolo[2,1-*b*]thiazole, 1908.
studies on the synthesis of. Part CXXXV, the structure of corpaverine, 715. Part CXXXVI, rearrangement of 2-nitro-1-tetralone oxime with polyphosphoric acid, 717.
syntheses of. Part XI, quinolines and pyrones from the reaction of *N*-aminophenyl heterocycles with β-ketoesters in polyphosphoric acid, 186. Part XII, halogen-substituted 3-arylsydnones, 189. Part XIII, imidazoles from *N*-acylamino-naphthyl and -phenyl heterocycles by cyclisation with polyphosphoric acid, 1572. Part XIV, oxazoles from the pyrolysis of aryl azides in a mixture of a carboxylic and polyphosphoric acid, 1980.
with bridgehead nitrogen atoms. Part III, the formation of cyclopenta[*c*]quinolizines from 3-α-dimethylamino-vinylindolizines and dimethyl acetylenedicarboxylate, 324.
Heterocyclic *N*-oxides. Part IV, a general route to 2-n-alkyl-3,4-dihydro-3-oxoquinoxalines and their *N*-oxides, 2285. Part V, the base-catalysed cyclisation of *N*-substituted *o*-nitrobenzamides to 1,4-dihydro-1-hydroxy-4-oxoquinazolines, 2287.
studies. Part I, ring-opening of some 4-hydroxy-pteridine derivatives, 1112.
Hexamethyleneimine, *N*-hydroxy-. Aliphatic hydroxylamines. Part IV, 1103.
***cis*-Hex-2-en-4-yne, 1-chloro-,** double prototropic rearrangement of, by phenyl-lithium, 578.
Hexœstrol, [3,4-di-(*p*-hydroxyphenyl)hexane], some derivatives of. Steroid hormones. Part XVIII, 1213.
Hexopyranoside derivatives, methyl 2,3-didehydro-2,3-dideoxy-, displacements of 4- and 6-sulphonyloxy-groups from. Unsaturated carbohydrates. Part V, 446.
D-*xylo*-Hexose, 3- and 4-deoxy-, nucleosides derived from, 1549.
Hexoses and derived di-, tri-, and poly-saccharides, the pyrolysis of some, 1473.
α-D-Hexosid-3-ulose, methyl 4,6-*O*-benzylidene-, phenylhydrazones, reduction of. Nitrogen-containing carbohydrate derivatives, 1508.
Hexosid-3-uloses, a route to: rearrangement of methyl 4,6-*O*-benzylidene-3-deoxy-3-phenylazo-aldohexopyranosides with alkali. Nitrogen-containing carbohydrate derivatives. Part X, 695.
Hop constituents, the chemistry of. Part XXVIII, the structure of an autoxidation product of humulone, 675. Part XXIX, a synthesis of (±)-isohumulone, 1615.
Hopane, 7β-acetoxy-22-hydroxy-, isolation from *Sticta billardierii* Del. and structural elucidation. Lichens and fungi. Part II, 1556.
15α,22-dihydroxy-, structural elucidation of, from *Sticta billardierii* Del. Lichens and fungi. Part III, 1564.
Humulone, structure of an autoxidation product of. The chemistry of hop constituents. Part XXVIII, 675.
Hydrazine, 2,4-dinitrophenyl-, reactions with some 1,4-diketones, 341.
Hydrazines, substituted-benzylidene, conversion into hydrazides, 1319.
Hydrazones, further reactions with. Reactions of lead tetra-acetate. Part VI, 1531.
substituted, reactions of lead tetra-acetate with, 1202.
Hydrogenation, catalytic, with a soluble catalyst, 1894.
mechanisms of. Part V, the hydrogenation of olefinic

Hydrogenation (*contd.*)
and acetylenic substances. The influence of stereochemistry and substitution on chemisorption and on chromatography, 458.
Hydroperoxide groups in monohydroperoxides formed by chlorophyll-photosensitised oxidation of unsaturated esters, location of, 1897.
Hydroxamic acids, oxidation of, 354.
Hydroxylamine, tristrifluoromethyl-, the photochemical decomposition of. Perfluoroalkyl derivatives of nitrogen. Part XXIII, 1236.
Hydroxylamines, aliphatic. Part IV, *N*-hydroxyhexamethyleneimine, 1103. Part V, the crystal structure of 1,8-dihydroxy-1,8-diazacyclotetradecane, 1108.

I

Imidazoles from *N*-acylamino-naphthyl and -phenyl heterocycles by cyclisation with polyphosphoric acid. Syntheses of heterocyclic compounds. Part XIII, 1572.
purines, and pyrimidines. Part XXIV, synthesis of zeatin, a naturally occurring adenine derivative with plant cell-division-promoting activity, and its 9-β-D-ribofuranoside, 921. Some chemical reactions and interconversions of intermediates in the sequence of biosynthesis *de novo* of purine nucleotides leading to imidazole nucleotides, 2270.
Imidazolines. 2-Amino-2-imidazolines and 2-amino-2-oxazolines. Part III, 65.
Imidazopyridines, preparation by the pyrolytic cyclisation of 3-azidopyridines, 80.
Imidazo[1,2-*a*]pyridine, 2,3-dihydro-2-oxo-, condensation with *o*-nitrobenzaldehyde, 1095.
Imidazo[2,1-*b*]thiazolium bromide, 2,3,6,7-tetrahydro-, and some 2-iminothiazolidine precursors, 1226.
Indane-1,3-dione, 2-diazo-, some reactions of, 857.
Indan-1-one, some derivatives of, 1887.
Indanthrone, chemistry of. Part X, 7,16-dihydrodinaphtho[2,3-*b*;2′,3′-*i*]phenazine-5,9,14,18-diquinone: a linear isomer of indanthrone, 277. Part XI, the reduction of the dihydrodinaphthophenazinediquinones, 2081. Part XII, some properties of the dinaphthophenazinediquinones and their NN′-dihydro-derivatives, 2090.
Indazoles, 1-phenyl- and derivatives, and pyridyl-, the synthesis of. Reactions of lead tetra-acetate. Part V, 1527.
Indene, reaction of benzyl and phenyl radicals with, 2019.
4*H*-Indeno[2,1-*d*]thiazolium salts, a synthesis of. Studies of heterocyclic compounds. Part III, 686.
Indoles, 2-alkyl- and 2-aryl-, reactions with azides, 1345.
methoxy-, a new synthesis of, 344.
Indolizines, preparation of, from ethyl bromopyruvate and ethyl 2-pyridylacetate, 2120.
Ionisation constants of biphenyl-4-carboxylic acid and 4-aminobiphenyl, effects of 3′- and 4′-substituents on, 831.
of biphenyl-4-carboxylic acid, 4-aminobiphenyl, and 4-biphenylylacetic acid, effects of 2′-substituents on, 837.
Iron, tricarbonyl-, –vitamin A aldehyde adduct, 2060.
Iron pentacarbonyl as a hydroformylation catalyst. Metal carbonyl chemistry. Part III, 1447.
Isatogens. Part IV, 1596.
Isoatisirene, kaurene, stachene, and trachylobane. The acid-catalysed rearrangement of diterpene hydrocarbons. Part I, 2319.
(±)-Isobalfourodine, (±)-platydesmine, and related compounds, the synthesis and nuclear magnetic resonance spectra of. Quinoline alkaloids. Part VIII, 1504.
Isoboldine and glaucine, the synthesis of. Phenol oxidation. Part I, 2061.
Isocorytuberine, orientalinone, and corydine, synthesis of. Phenol oxidation. Part II, 2222.
Isoflavans, isoflav-3-enes, and isoflavylium salts, syntheses of. The chemistry of the "insoluble red" woods. Part X, 629.
Isoflavones, synthesis of. Part IV. Munetone, 749.
(±)-Isohumulone, a synthesis of. The chemistry of hop constituents. Part XXIX, 1615.
Isoindolobenzoxazinones, fused, reaction of hydrazine with some, 573.
Isomerisation accompanying Friedel–Crafts alkylation. Part II, further results with butyl ethers and alcohols, 712.
Isopteropodine and pteropodine, isolation and structures of. Alkaloids of *Uncaria pteropoda*, 2245.
Isoquinaldonitrile, 2-benzoyl-1,2-dihydro-, model reactions based on. Reissert compound studies. Part XIII, 1860.
Isoquinoline, the reductive alkylation of, 2140.
heptafluoro-, and heptafluoroquinoline. Polyfluoroheterocyclic compounds. Part VII, 2328.
and heptafluoroquinoline, nucleophilic substitution in. Polyfluoroheterocyclic compounds. Part VIII, 2331.
Isoquinolines, 1-benzyltetrahydro-, and aporphines, quaternary compounds of. Optical rotatory dispersion. Part XXVI, 1340.
Itaconic acids, γγ-disubstituted. Part III, the Stobbe condensation of *o*- and *p*-chlorobenzophenone with succinic esters, 603.

J

Jacareubin, an unambiguous synthesis of. Studies in the xanthone series. Part VIII, 175.
Jasmolins, new insecticidally active constituents of *Chrysanthemum cinerariaefolium* VIS, 332.

K

Kaurene, isoatisirene, stachene, and trachylobane. The acid-catalysed rearrangement of diterpene hydrocarbons. Part I, 2319.
Ketones, alicyclic, nuclear magnetic resonance solvent shifts of methyl groups in: pyrrole and other aromatic solvents, 1613.
reduction with lithium aluminium hydride complexes. Asymmetric syntheses. Part I, 1822.
reduction with the lithium aluminium hydride–3-*O*-benzyl-1,2-*O*-cyclohexylidene-α-D-glucofuranose complex. Asymmetric syntheses. Part II, 2280.
αβ-unsaturated. Clemmensen reduction. Part III, 2006.
vinyl, a convenient preparation of, 1972.
The formation of mono- and di-ketones in the Friedel–Crafts acetylation of anthracene, 1729.
The reactions of some 1,4-diketones with 2,4-dinitrophenylhydrazine, 341.
Khaplofoline, the synthesis of. Quinoline alkaloids. Part VII, 1084.

Khayasin and *Cedrela odorata* substance "B", some reactions of. West African timbers. Part XVIII, 2127.
Khivorin and gedunin, inter-relation of. West African timbers. Part XII, 506.
Koenigs–Knorr syntheses with mercuric salts, 530.

L

β-Lactams, new bicyclic, synthesis of, 1241.
Lactones, unsaturated, and related compounds, addition of L-cysteine to, 1123.
Lead tetra-acetate, reactions of. Part V, the synthesis of 1-phenylindazole and some derivatives, pyridylindazoles, and thienopyrazoles, 1527. Part VI, further reactions with hydrazones, 1531. Part VII, some reactions leading to pyrazoles, 1536. Part VIII, the reactions of azoacetates with base, 1781.
Leucodrin, the structure and chemistry of, 1918.
Lichens and fungi. Part II, isolation and structural elucidation of 7β-acetoxy-22-hydroxyhopane from *Sticta billardierii* Del., 1556. Part III, structural elucidation of 15α, 22-dihydroxyhopane from *S. billardierii* Del., 1564.
Lignans. Synthesis of (±)-otobain, 1717.
Ligularia Fischeri Turcz., components of the root of. Studies on sesquiterpenoids. Part XIII, 1545.
Lonchocarpic acid, structure of. Extractives from *Derris scandens*. Part I, 192.
Lysine and glutamic acid residues, the synthesis of some oligopeptides containing. Polypeptides. Part XIV, 2349.
L-Lysine, synthesis of some dibasic sulphur-containing amino-acids related to, 1098.
Lyxopyranosides, methyl 2,3-anhydro-, and methyl 3,4-anhydroarabinopyranosides, 1926.

M

Macrocyclic compounds. Part XII, *cis–trans* equilibria in nonconjugated cycloalkadienes, 264.
Maleic anhydride, dimethyl-, *exo*-photodimerisation. Liquid-phase photolysis. Part IX, 167.
DL-Mandelic acid, action of γ-radiation on oxygenated solutions of. Effect of γ-radiation. Part X, 511.
Mandelic acid, 2,4-dimethoxy-, and 2,4-dimethoxyphenylglyoxylic acid, derivatives of, 1221.
Mangiferin; the nuclear magnetic resonance spectra of xanthones. *C*-Glycosyl compounds. Part V, 1685.
Matriearianol, dehydro-, the biological oxidation of. Natural acetylenes. Part XXIV, 1617.
Mbarraxanthone and ugaxanthone from *Symphonia globulifera* L., isolation and structure of, 2265.
Meliacins and their derivatives, a correlation of the spectra of some. Nuclear magnetic resonance spectroscopy, 1794.
Menazon, hydrolysis products, 56.
***p*-Menth-1- and -3-ene,** epoxidation of, 612.
Mercury, dibenzyl- and diphenyl-, pyrolysis of, in aromatic hydrocarbons, 1184.
Organomercury compounds. Part I, mercury pentafluorobenzoates and their decarboxylation to pentafluorophenylmercury compounds, 106. Part II, preparations of complexes of bisperfluoroalkylmercurials by decarboxylation reactions, 1058.
Metal carbonyl chemistry. Part III, iron pentacarbonyl as a hydroformylation catalyst, 1447.
Methadone and **methadone nitrile,** reaction with cyanogen bromide, 438.
Methazonic acid, reactions of. Part V, formation of quinazoline 3-oxides, 1433.
Micrococcin *P*, chemistry of. Part VII, dimethyl micrococcinate and some synthetic pyridine–polythiazole carboxylic esters, 1354. Part VIII, a method for the degradation of thiazole-4-carboxylic acids, 1357. Part IX, the crystal and molecular structure of micrococcinic acid bis-4-bromoanilide, 1361. Part X, proton magnetic resonance spectrum of dimethyl micrococcinate, and the probable mode of biosynthesis of micrococcinic acid, 1371.
Molybdenum carbonyl complexes of bis(diphenylphosphino)-alkylamines. Tervalent phosphorus–nitrogen chemistry. Part III, 498.
Mopanols and peltogynols and associated flavonoids from *Colophospermum mopane*, stereochemistry and biosynthesis of, 1644.
Mucoinositol, synthesis of. Suppression of epoxide migration. Cyclitols. Part XXIII, 798.
Muconic diamides and **mucononitriles,** the isomeric. Polyene acids. Part VIII, 385.
Muconic esters and **mucononitriles,** proton magnetic resonance parameters of. Polyene acids. Part IX, 387.
Munetone. Synthesis of isoflavones. Part IV, 749.
D-Mycarose, and D-cladinose, synthesis of. Branched-chain sugars. Part VII, 398.
Mycological chemistry, studies in. Part XIX, "product B" (averantin) [1,3,6,8-tetrahydroxy-2-(1-hydroxyhexyl)anthraquinone], a pigment from *Aspergillus versicolor* (Vuillemin) Tiraboschi, 855. Part XX, synthesis of (±)-tetrahydro-4-hydroxy-6-methoxyfuro[2,3-*b*]benzofuran, a racemic form of a laevorotatory degradation product of dihydrosterigmatocystin, 1308. Part XXI, the structure of aurofusarin, a metabolite of some *Fusarium* species, 2234.
Myoinositols, mannosyl- and mannosylmannosyl-, and galactinol, synthesis of. Cyclitols. Part XXII, 433.

N

Naphthalene, 2-bromo-, a re-examination of the Friedel–Crafts acetylation of, 518.
2,4-dinitro-1-thiocyanato-, 747.
2-methoxy-, a re-examination of the Friedel–Crafts acetylation of, 181.
1,2,3,5- and 1,2,3,8-tetramethyl-, 1892.
Naphthalenes, dimethoxy-, some reactions of. Part II, the orientation of naphthalene derivatives by nuclear magnetic resonance spectrometry, 904.
fluoronitro-, synthesis *via* a modified Schiemann reaction, 748.
1,4-Naphthaquinone, 2,3-dimethyl-, dimer, 123.
1,4-Naphthaquinones, 2-hydroxy-, new routes to. Quinones. Part VII, 2184.
Naphtho[2,1-*b*]furan-1,2-dicarboxylate, diethyl, thermal conversion of diethyl 2-naphthoxyoxalacetate into. A novel cyclodehydration, 463.
Naphthopyrans and chromens, reaction with bromine and chlorine. Part IV, 2013.
Naphthylamines, *N*-acetyl nitro-, chlorination of, 1038.
1,8-Naphthyridines, 315.

Nerol, geraniol, farnesol, and phytol, stereochemistry and synthesis of. Carotenoids and related compounds. Part XIV, 2144.

Neurosporene, phytoene, phytofluene, and ξ-carotene synthesis of. Carotenoids and related compounds. Part XV, 2154.

Nickel, Raney alloy, reductions with, in alkaline solution, 531.

Nicotinic acids and **nicotinamides,** 4-substituted, the preparation of some, 1816.

Nitramines, chemistry of. Part I, some reactions of 3-acetoxymethyl-1,5-dinitro-1,3,5-triazacycloheptane and related compounds, 862. Part II, some reactions of 1-acetoxymethyl-3,5-dinitro-1,3,5-triazacyclohexane and 1-acetoxymethyl-3,5,7-trinitro-1,3,5,7-tetra-azacyclo-octane, 867. Part III, cyclic nitramines derived from trimethylenedinitramine, 870.

Nitro-compound, new, naturally-occurring. 1-Amino-2-nitrocyclopentanecarboxylic acid, 255.

Nitrogen, perfluoroalkyl compounds of. Part XXII, the reaction of nitric oxide with hexafluoropropene, 1232. Part XXIII, the photochemical decomposition of tristrifluoromethylhydroxylamine, 1236. Part XXIV, perfluoroalkylnitroso-compounds from perfluoroacyl nitrites, 1350.

Nitrones. Part III, photolysis of cyclic nitrones, 2295. Part IV, synthesis and properties of a monocyclic α-dinitrone, 2300.

cyclic. Part II, the oxidation of cyclic nitrones by iron(III) chloride, 1477.

cyclic, additions to: synthesis of a pyrrolo[1,2-*b*]-1,2-benzisoxazole, 1338.

periodate oxidation of, 412.

Nitroxide, bistrifluoromethyl-, some reactions of. Perfluoroalkyl derivatives of nitrogen. Part XXI, 901.

radicals. Part II, the oxidation of phenols to quinones by stable nitroxide radicals, 1844.

Norbornadiene, hexachloro-, some free-radical addition reactions of, 1498.

the addition of ethanethiol and methanethiol to, 1540.

Norborn-2-ene, 5,6-dimethylene-, addition of thiols to, and its reactivity towards thiol addition relative to the reactivity of other bridged polycyclic olefins, 1045.

Norbornene sulphoxides. Neighbouring-group participation by sulphinyl oxygen. Part I, 1585.

Norpluviine, the biosynthesis of. Phenol oxidation and biosynthesis. Part IX, 676.

Norsolorinic acid and solorinic acid. Naturally occurring quinones. Part VIII, 1727.

Northebaine, syntheses related to. Part I, northebaine and *N*-allylnorthebaine, 617.

Nucleosides derived from 3- and 4-deoxy-D-xylo-hexose, 1549.

O

Octadec-8-yne, D-*ribo*-2-benzamido-1,3,4-trihydroxy-, a synthesis of, 1882.

Olearia paniculata, extractives from the leaves of, 1814.

Olefinic and acetylenic substances, hydrogenation of. The influence of stereochemistry and substitution on chemisorption and on chromatography, 458.

Olefin synthesis, Wittig, mechanism of, 1090.

Olefins, hydroformylation products of. Influence of carbon monoxide partial pressure on the isomeric distribution of, 488.

nonconjugated, a method of *cis, trans*-isomerisation without double-bond migration, 260.

The addition of thiols to 5,6-dimethylenenorborn-2-ene, and its reactivity towards thiol addition relative to the reactivity of other bridged polycyclic olefins, 1045.

Optical rotatory dispersion. Part XXVIII, the absolute configuration of otobain and derivatives, 893. Part XXX. [The chemistry of fungi. Part LIV.], the optical rotatory dispersion of rosenonolactone and related compounds, 896. Part XXXVI, quaternary compounds of 1-benzyltetrahydroisoquinolines and of aporphines, 1340. Part XXXVII, tri- and tetra-peptides of alanine and serine, 1449. Part XXXVIII [Azomethines. Part III], configurational assignment in the α-amino-acid series using *N*-alkylidene derivatives, 2047.

studies. Part CV [The chemistry of fungi. Part LIII.], the absolute configuration of rosenono- and rosololactone, 624.

Organometallic compounds of Group II. Part VI, 1,2-acenaphthenylenecalcium, 154.

reactions. Part IV, the preparation of bistrialkyltin derivatives of urea and biuret by the decarboxylation of bistrialkyltin oxide–isocyanate adducts, 299. Part V, trialkylstannylation of amides, 1311.

syntheses, the protection of aminophenyl groups, in, 1706.

Orientalinone, corydine, and isocorytuberine, synthesis of. Phenol oxidation. Part II, 2222.

Osajin, isolation of. The extractives from *Derris scandens*. Part II, 701.

Osotriazoles and 4-formyl-2-phenyl-1,2,3-triazole, derivatives of, 91.

Ostreogrycin complex, antibiotics of the. Part II, structure of ostreogrycin A, 1653. Part III, the structure of ostreogrycin A. Evidence based on nuclear magnetic double resonance experiments and high-resolution mass spectrometry, 1669. Part IV, the structure of ostreogrycin G, 1856.

Otobain, and derivatives, the absolute configuration of. Optical rotatory dispersion. Part XXVIII, 893.

(±)-Otobain, synthesis of, 1717.

Otobaphenol, the constitution of, 1775.

Oxadiazoles, from the reaction of benzoyldicyandiamide [PhCO·NH·C(NH$_2$):N·CN] with hydroxylamine hydrochloride, 1522.

3-Oxagranatan-7-one, 9-methyl-, and 9-methyl-3-oxagranatan-7α-ol, and ψ-pelletierine, mass spectra of, 1207.

1,3,5,7,9,11-Oxapentathiacyclododecane, synthesis of, 428.

1,3,5,7,9-Oxatetrathiacyclodecane, synthesis of, 428.

1,3-Oxathiolan, reductive fission of a, by sodium in liquid ammonia, 415.

Oxazoles from the pyrolysis of aryl azides in a mixture of a carboxylic and polyphosphoric acid. Syntheses of heterocyclic compounds. Part XIV, 1980.

Oxazolines. 2-Amino-2-imidazolines and 2-amino-2-oxazolines. Part III, 65.

Oxetans, 2-substituted, pyrolysis of, 389.

Oxidation, by persulphate. Part IV, silver-catalysed oxidation of primary aliphatic amines, 1384. Part V, silver-catalysed oxidation of secondary aliphatic amines and α-amino-acids, 1388.

***N*-Oxides** and related compounds. Part XXVIII, 5-amino- and 5-hydroxy-benzofuroxans, 971.
Oxindoles derived from sporidesmin-B. Sporidesmins. Part VII, 1803.
Oxindolylideneacetone, Diels–Alder reactions of, 1028.

P

[10]**Paracyclophane,** attempted synthesis of nitrogen-containing analogues of, 334.
ψ-Pelletierine, 9-methyl-3-oxagranatan-7-one, and 9-methyl-3-oxagranatan-7α-ol, mass spectra of, 1207.
Peltogynols and mopanols and associated flavanoids from *Colophospermum mopane*, stereochemistry and biogenesis of, 1644.
Peptide synthesis, new methods in. Part III, protection of carboxyl group, 1191.
Peptides. Part XXI, dehydrogenation of some thiazolines derived from cysteine, 1061. Part XXIII, experiments on the oxidation of thiostrepton, 2115.
tri- and tetra-, of alanine and serine. Optical rotatory dispersion. Part XXXVII, 1449.
Polypeptides. Part II, a " hydrazino-peptide " analogue of norophthalmic acid amide, 60. Part III, the synthesis of the *C*-terminal tetrapeptide sequence of gastrin, its optical isomers, and acylated derivatives, 555.
Polypeptides. Part XIII, the use of β-methylthioethyl esters for the protection of carboxyl groups in peptide synthesis, 807. Part XIV, the synthesis of some oligopeptides containing lysine and glutamic acid residues, 2349.
The synthesis of actinomycin analogues. Part II, actinocylgramicidin S, 1406.
Peracetic acid, trifluoro-, epoxidation with. Maleic anhydride adducts of cyclic polyenes, 592.
***Periplaneta americana*,** the American cockroach, on the structure of the sex attractant of, 464.
Peroxides of elements other than carbon. Part XI, the oxidation of some trialkylboroxines, 1493.
Persulphate, oxidation by. Part IV, silver-catalysed oxidation of primary aliphatic amines, 1384. Part V, silver-catalysed oxidation of secondary aliphatic amines and α-amino-acids, 1388.
Phenalenone, 2,3-dihydro-, reaction with benzaldehyde, 2011.
Phenol oxidation. Part I, the synthesis of isoboldine and glaucine, 2061. Part II, synthesis of orientalinone, corydine, and isocorytuberine, 2222.
oxidation and biosynthesis. Part IX, the biosynthesis of norpluviine and galanthine, 676. Part XI, the structure of stebisimine and the biosynthesis of epistephanine, 2313.
2,6-dimethyl-, a comparison of oxidants for. Metal ions and complexes in organic reactions. Part VI, 791.
2,3,4,5-tetrachloro-, a convenient synthesis of: the diazotisation of 3,4,5,6-tetrachloroanthranilic acid, 478.
Phenols, biosynthesis of. Part X, mutation and radioactive tracer studies relating to the biosynthesis of sulochrin, 168.
oxidation to quinones by stable nitroxide radicals. Nitroxide radicals. Part II, 1844.
alkoxy-, oxidation of. Part VIII, further examples of trimerisation to spiroketals, 2274.
tropyl-, reactions of some. Novel aromatic systems. Part II, 926.
Oxidation of alkoxy-phenols. Part VI, a hemi-acetal from 4-methoxy-2-t-butylphenol, 362.
Tritylation of aminophenols, 297.
Phenylhydrazones and phenylazoalkanes, studies on the possible interconversion of. Part III, adipaldehyde bis-phenylhydrazone, 1989.
Phorone, photoisomerisation of, 571.
Phosphonium alkoxides, thermal decomposition, 67.
Phosphono-amino-acids and ninhydrin, metaphosphate formation from, 1349.
Phosphoramidates, displacements on: the nature of the transition state, 404.
non-hydrolytic conversion into phosphates. Amide as a protecting group in phosphate synthesis. Part II, 640.
Phosphoramidic diesters, the acid hydrolysis of. Amide as a protecting group in phosphate ester synthesis. Part I, 637.
Phosphorus heterocycles. Part I, a conjugated cyclic methylenephosphorane, 2003.
compounds, heterocyclic, a new synthesis of, 245.
tribromide, dimethylenation of. Synthesis of derivatives of di(bromomethyl)phosphinic acid, 1096.
tervalent, –nitrogen chemistry. Part III, molybdenum carbonyl complexes of bis(diphenylphosphino)alkylamines, 498.
tervalent, –nitrogen compounds, reactions of. Part I, polyhalogenated alkanes, 1001.
Cyclic organophosphorus compounds as possible pesticides. Part I, 1,3,2-dioxaphospholans, 1997. Part II, 1,3,2-dioxaphosphorinans, 2001.
Organophosphorus chemistry. Part V, preparation of pentafluorophenylphosphorus chlorides and their reactions with amines, 1592. Part VII, the reaction of phosphine with trifluoroethylene, 2075.
Organophosphorus compounds of sulphur and selenium. Part XXXV, oxophosphoranesulphenamides. Reactions of dialkylaminosulphenyl chlorides with dialkyl and trialkyl phosphites, 2249.
Organophosphorus intermediates. Part I, the formation and decomposition of phenylphosphinic anhydride, 2176.
Some aliphatic diphosphonic tetrachlorides, 757.
Synthesis and properties of 1,3-diaza-1,3-dihydro-2-phospholo[4,5-*d*]pyrimidine 2-oxides, 1242.
The reaction of 2,4-dinitrofluorobenzene with phosphoro- and phosphono-thiolates, 1410.
The reactions of tetraphenyldiphosphine with alcohols, 722.
The rearrangement of alk-2-enyl diphenylphosphinites, 1842.
The synthesis, structure, and reactions of 1,2,3-triphenyl-1,2,3-triphosphaindane, a novel heterocyclic system. A new synthesis of the 5,10-dihydrophosphanthren system, 916.
Phosphorylation, studies in. Part XXIX, the synthesis of dialkyl phosphates from monoalkyl phosphonates: direct oxidative esterification, 239
Photochemical decomposition of tristrifluoromethylhydroxylamine. Perfluoroalkyl derivatives of nitrogen. Part XXIII, 1236.
transformations of tropolones. Part II, 4′,5′-dimethoxy-6,7-benztropolone methyl ether and its photo-oxidation, 2072.

Photochemistry of 1-methylthymine and 3-methylthymine, 1342.
of organic nitrogen compounds. Part II, the photolysis of pyrazolenines *via* diazo-compounds, 1719.
studies in. Part II, the photocyclisation of stilbazoles to azaphenanthrenes, 1078.
Light-induced and related reactions of quinones. Part I, the mechanism of formation of acetylquinol from 1,4-benzoquinone and acetaldehyde, 449. Part II, reactions involving chloranil and acetaldehyde, 1624. Part III, light-induced reactions of some monosubstituted 1,4-benzoquinones, 1627.
Liquid-phase photolysis. Part IX, *exo*-photodimerisation of dimethylmaleic anhydride, 167.
Nitrones. Part III, photolysis of cyclic nitrones, 2295.
Organoboron compounds. Part VI, photochemical reactions of aryl and alkyl halides with boron halides, 566.
The structure of thymine photo-dimer, 2239.
Photoisomerisation of phorone, 571.
Phthalans, 1-phenyl- and 1,3-diphenyl-, and 2-formyl-2′-methylbiphenyl, abstraction of benzylic hydrogen atoms from, by t-butoxy-radicals. Steric influences in radical reactions. Part II, 929.
Phthalides, n-butyl-tetra- and -hexa-hydro-, synthesis of, 1152.
Phthiocerol, studies relating to. Part V, phthiocerol A and B, 2107. Part VI, stereochemical studies, 2113.
Phytoene, phytofluene, ξ-carotene, and neurosporene, synthesis of. Carotenoids and related compounds. Part XV, 2154.
Phytol, geraniol, nerol, and farnesol, stereochemistry and synthesis of. Carotenoids and related compounds. Part XIV, 2144.
Phytosphingosines, a synthesis of, from D-galactose, 1876.
from D-glucosamine, 1872.
2-Piperidones, basic, as potential central nervous system depressants and anticholinergics, 802.
(±)-Platydesmine, (±)-isobalfourodine, and related compounds, the synthesis and nuclear magnetic resonance spectra of. Quinoline alkaloids. Part VIII, 1504.
Pollen and spore membranes, chemical studies on constitution, 16.
Polyenes, cyclic, maleic anhydride adducts of. Epoxidation with trifluoroperacetic acid, 592.
Poly-(6-*O*-methacryloyl-D-galactose) and **poly-(6-*O*-acryloyl-D-galactose),** preparation and derivatives of, 1913.
Polyporic acid series. Potential anti-tumour agents. Part IV, 1041.
Polysaccharides of soy-beans. Part II, fractionation of hull cell-wall polysaccharides and the structure of a xylan, 1945.
periodate-oxidised, properties of. Part VII, the structure of nitrogen-containing derivatives as deduced from a study of monosaccharide analogues, 2121.
Porphyrins and related compounds, the *meso*-reactivity of. Part II, halogenation, 1600.
unsymmetrical, a stepwise synthesis of, 22.
1,19-Disubstituted tetradehydrocorrins, 30.
meso-Substitution products of ætioporphyrin I, 794.
Synthesis of rhodoporphyrin XV diethyl ester and related porphins, 1436.
The base-catalysed cyclisations of 1,19-dideoxybiladienes-ac, 880.
The synthesis of 5,5-bi-(dipyrromethenyls) and related compounds, 98.
5α-Pregnan-20-ones, 16α,17α-epoxy-16β-methyl-, reaction with boron trifluoride. Compounds related to the steroid hormones. Part XVIII, 2210.
5α-Pregn-9-ene-3,20-dione, 21-acetoxy-17-hydroxy-16β-methyl-, an improved method of preparation of. Compounds related to the steroid hormones. Part XVII, 2201.
Propane, [$^2H_3$]-, and [$^2H_6$]ethane and [$^2H_5$]bromoethane, preparation of, 942.
Propene, 1,3-diphenyl-, ion-radical; fragmentation of. Some novel elimination of neutral fragments from ions in mass spectrometry. Part III, 1955.
Protoaphin-*fb*, coupling reactions involving the quinone A derived by reduction of. Colouring matters of the Aphididae. Part XXX, 1836.
Protoaphins, reconstruction of, and synthesis of the chrysoaphin chromophore. A coupling reaction involving phenols and quinones. Colouring matters of the Aphididae. Part XXVIII, 1825.
Pseudoazulenes. Part V, the chemistry of 2,4,5,6-tetraphenylcyclopenta[*b*]pyran, 859.
***Ptæroxylon obliquum*.** Extractives from East African timbers. Part II, 114.
Pteridine derivatives. Part X. The addition reactions of 2-amino-7,8-dihydro-4-hydroxypteridine, 285.
studies. Part XXXI, the covalent hydration and subsequent oxidation of 8-methyl derivatives of some amino- and hydroxy-pteridines, 1065. Part XXXII, nucleophilic addition reactions of 2-aminopteridine, 1117.
4-hydroxy-, ring-opening of some derivatives. Heterocyclic studies. Part I, 1112.
Pteridines, alkylamino-, formation, ionisation, and spectra, 226.
***Pterocarpus erinaceous*,** extractives from the heartwood of. West African timbers. Part XIII, 509.
Pteropodine and isopteropodine, isolation and structures of. Alkaloids of *Uncaria pteropoda*, 2245.
Pulvilloric acid, the structure of, 1608.
Purine, 3-methyl-, new derivatives of, 10.
Purines and their derivatives, action of alkali on some, 692.
alkylamino-, formation, ionisation, and spectra, 226.
pyrimidines, and imidazoles. Part XXIV, syntheses of zeatin, a naturally occurring adenine derivative with plant cell-division-promoting activity, and its 9-β-D-ribofuranoside, 921. Part XXV, some chemical reactions and interconversions of intermediates in the sequence of biosynthesis *de novo* of purine nucleotides leading to imidazole nucleotides, 2270.
Purpurogallin, oxidation by oxygen and hydrogen peroxide, 2255.
Pyranoid rings, preference shown by allylic ester groupings for the *quasi*-axial orientation. Unsaturated carbohydrates. Part VII, 2345.
Pyrans, and thiins, triphenyl- and tetraphenyl-cyclopentadienylidene-, 1086.
Pyrazine heterocycles, dihydration (covalent) of, 999.
Pyrazines, chloro-, and their *N*-oxides. Reactions with thiourea, 495.
Pyrazole derivatives, iodinated, 1179.
Pyrazolenines, photolysis *via* diazo-compounds. Photochemistry of organic compounds. Part II, 1719.
Pyrazoles, some reactions leading to. Reactions of lead tetra-acetate. Part VII, 1536.

Pyrazolo-*as*-triazines. Part I, 1127. Part II, bromination, 1214.
Pyridazines and **pyrazines** with dimethyl acetylenedicarboxylate. Addition reactions of heterocyclic compounds. Part XXV, 2218.
Pyridine, tetrafluoro-4-nitro-, nucleophilic substitution in. Polyfluoro-heterocyclic compounds. Part VI, 220.
–polythiazole carboxylic esters, some synthetic, and dimethyl micrococcinate. Chemistry of micrococcin *P*. Part VII, 1354.
Pyridines, acyl-, condensations of, with amines. Part I, 2-acylpyridines and aminoacetal, 1209.
chlorofluoro-, and chlorofluorobenzenes, preparation by halogen exchange with fused salts, 2142.
dihydro-, from dimethyl acetylenedicarboxylate and Schiff bases, 1121.
Preparation of imidazopyridines by the pyrolytic cyclisation of 3-azidopyridines, 80.
Some derivatives of 1,2,3,6-tetrahydro-4-phenylpyridine, 64.
The reaction of diazomethane with 2,2′-azopyridines, 78.
Pyrido[2,1-*a*]isoindole, 1,2,3,4,6,10b-hexahydro-, the synthesis of, 2016.
Pyrimidine 4-amino-group, role of, in thiamine, 649.
5-cyano-1,2-dihydro-2-imino-1-methyl-, abnormal behaviour. The Dimroth rearrangement. Part VI, 164.
Pyrimidines and their derivatives, the action of alkali on some, 1784.
purines, and imidazoles. Part XXIV, syntheses of zeatin, a naturally occurring adenine derivative with plant cell-division-promoting activity, and its 9-β-D-ribofuranoside, 921. Part XXV, some chemical reactions and interconversions of intermediates in the sequence of biosynthesis *de novo* of purine nucleotides leading to imidazole nucleotides, 2270.
alkylamino-, formation, ionisation, and spectra, 226.
5-(*p*-trimethylsilylbenzyl)-, 493.
The Dimroth rearrangement. Part VII, measurement of equilibria in reversible examples from the pyrimidine series, 1165.
Pyrones. Syntheses of heterocyclic compounds. Part XI, quinolines and pyrones from the reaction of *N*-aminophenyl heterocycles with β-ketoesters in polyphosphoric acid, 186.
Pyronocoumarins and coumarins. Aspects of mass spectra of organic compounds. Part I, 1712.
Pyrrolidones, 5-(pyrrol-2-ylmethyl)-, and related compounds, condensation reactions of, 1155.
Pyrroline series, studies in the. Part VI, the formulation of the base $C_{13}H_{23}NO_3$ as a 1-pyrroline 1-oxide, 1491.
Pyrrolines. The reaction of 5,5,5′,5′-tetramethyl-2,2′-azo-1,1′-pyrroline 1,1′-dioxide with sulphinic acids, 382.
3-Pyrrolin-2-one, 3,4-dimethyl-, structure of the formyl derivative, 40.
Pyrrolizidine alkaloids. The biosynthesis of echimidinic acid, 1968.
Pyrrolo[1,2-*b*]-1,2-benzisoxazole, synthesis of a: additions to cyclic nitrones, 1338.
Pyrrolo[1,2-*a*]quinoxalines, synthesis from *N*-(2-acylaminophenyl)pyrroles, 852.
Pyrrolo[2,1-*b*]thiazole, 6-methyl-, electrophilic substitution of. Studies of heterocyclic compounds. Part IV, 1908.

Q

Quinazoline 3-oxides, formation of. Reactions of methazonic acid. Part V, 1433.
Quinazolines. Part VIII, electronic effects in 2-substituted quinazolines, 234.
and 1,4-benzodiazepines. Part XXIX, synthesis of some 2,3-dihydro-5-pyridyl-1*H*-1,4-benzodiazepines, 1031.
1,4-dihydro-1-hydroxy-4-oxo-, the base-catalysed cyclisation of *N*-substituted *o*-nitrobenzamides to. Heterocyclic *N*-oxides. Part V, 2287.
Quinazolino[3,2-*b*]cinnolines, substituted, preparation and properties of, 2190.
Quinic acid and some derivatives, conformational studies of, 1885.
Quinoline alkaloids. Part VII, the synthesis of khaplofoline, 1084. Part VIII, the synthesis and nuclear magnetic resonance spectra of (±)-platydesmine, (±)-isobalfourodine, and related compounds, 1504.
Quinoline, heptafluoro-, and heptafluoroisoquinoline. Polyfluoroheterocyclic compounds. Part VII, 2328.
and heptafluoroisoquinoline, nucleophilic substitution in. Polyfluoroheterocyclic compounds. Part VIII, 2331.
Quinoline, tetrahydro-, derivatives. The acid-catalysed rearrangement of, 514.
Quinolines. Syntheses of heterocyclic compounds. Part XI, quinolines and pyrones from the reaction of *N*-aminophenyl heterocycles with β-ketoesters in polyphosphoric acid, 186.
The preparation of some tetra- and tri-fluoroquinolines, and some reactions of 5,6,7,8-tetrafluoroquinoline. Partially fluorinated heterocyclic compounds. Part I, 215.
4(1*H*)-Quinolones, hindered, infrared spectra of, 2311.
Quinones. Part VII, new routes to 2-hydroxy-1,4-naphthaquinones, 2184.
light-induced and related reactions of. Part I, the mechanism of formation of acetylquinol from 1,4-benzoquinone and acetaldehyde, 449. Part II, reactions involving chloranil and acetaldehyde, 1624. Part III, light-induced reactions of some monosubstituted 1,4-benzoquinones, 1627.
naturally occurring. Part VII, synthesis of spinochrome E, 426. Part VIII, solorinic acid and norsolorinic acid, 1727.
hydroxy-, the chemistry of. Part I, the reaction of 2-hydroxybenzoquinones with alkaline hydrogen peroxide, 2308.
Quinoxaline, 3-alkoxycarbonylmethylene-2-oxo-1,2,3,4-tetrahydro-, tautomerism of derivatives of, 806.
Quinoxalines and related compounds. Part VII, some reactions of quinoxaline *N*-oxides, 157.
2-n-alkyl-3,4-dihydro-3-oxo-, and their *N*-oxides, a general route to. Heterocyclic *N*-oxides. Part IV, 2285.

R

γ-Radiation, effect of. Part X, action of γ-radiation on oxygenated solutions of DL-mandelic acid, 511.
Radical reactions, polar influences in. Part V, hydrogen abstraction from nuclear-substituted ethylbenzenes and benzhydryl methyl ethers by atomic bromine, 935.

Radical reactions (*contd.*)
steric influences in. Part II, the abstraction of benzylic hydrogen atoms from 1-phenylphthalan, 1,3-diphenylphthalan, and 2-formyl-2′-methylbiphenyl by t-butoxy-radicals, **929**.
Radicals, dialkylamino-, some reactions of, **813**.
Reactions, organic, in aqueous solution at room temperature. Part IV, ***in vitro*** Oxidation of a benzylisoquinoline alkaloid to an aporphine alkaloid, **753**.
Rearrangements, molecular. Part VII, *NN*-diacylanilines, **1305**.
Reducations with Raney alloy in alkaline solution, **531**.
Reissert compound studies. Part XIII, model reactions based on 2-benzoyl-1,2-dihydroisoquinaldonitrile, **1860**.
Resorcinol, 4-amino-, and 4-aminocatechol, ethers of. The chemotherapy of schistosomiasis. Part VI, **366**.
Rhodoporphyrin XV diethyl ester and related porphins, synthesis of, **1436**.
D-[1-^{14}C]Ribose, 2-deoxy-, the preparation of, **704**.
Rimuene, constitution and stereochemistry of, **273**.
the structure of, **1737**.
Ring, medium-size, synthesis of, ***via*** alkoxy-radical decomposition, **937**.
Robustic acid, structure of. A new 4-hydroxy-3-phenylcoumarin, **606**.
Rodiasine, the structure of. Mass spectra of bisbenzylisoquinoline alkaloids. Alkaloids from Greenheart. Part III, **1082**.
Rosenono- and rosolo-lactone, the absolute configuration of. The chemistry of fungi. Part LIII, [optical rotatory dispersion studies. Part CV], **624**.
Rosenonolactone and related compounds, optical rotatory dispersion of. Optical rotatory dispersion. Part XXX, [the chemistry of fungi. Part LV], **896**.
Rotenoids. Aspects of the chemistry of 6,6a-dehydrorotenol, rotenononic acid, and isoderrisic acid acetates, **550**.
Novel features in the chemistry of (±)-6a, 12a-dihydrorotoxen-12(6*H*)-one, synthetic parent compound of the natural rotenoids, **544**.
The stereochemistry and conformation of (±)-6a, 12a-dihydrorotoxen-12(6*H*)-one and natural rotenoids from spin-coupling considerations, **542**.
Ruthenium tetroxide, oxidation of carbohydrate derivatives with, **1131**.
Rutin, a ψ-taraxasteryl ester, and a new steroid sapogenin, isolation of. Constituents of the leaves of *Ficus carica* L. Part II, **1140**.

S

(−)-Sandaracopimaradiene, synthesis from androstane derivatives, **1847**.
Sandmeyer reaction, an alternative to, **1249**.
Sarverogenin acetate, nuclear magnetic resonance spectrum of, **790**.
Scandenin, structure of. Extractives from *Derris scandens*. Part I, **192**.
Scandenone and **scandinone,** two new isoflavones, isolation of. The extractives from *Derris scandens*. Part II, **701**.
Schiemann reaction, modified, preparation of fluoronitronaphthalenes, **748**.
Schistosomiasis, chemotherapy of. Part VI, ethers of 4-aminocatechol and 4-aminoresorcinol, **366**. Part VII, 2-methyl- and 2-(substituted methyl)-4-aminophenyl ethers, **873**. Part VIII, 2-carboxy- and 2-carbamoyl-4-aminophenyl ethers, **2196**.
Scirpenol, diacetoxy-, chemistry of. (Phytotoxic compounds produced by *Fusarium equiseti*. Part II), **116**.
(+)- and (−)-Scoulerine, and (+)- and (−)-coreximine, synthesis of, **1052**.
Serine and alanine, tri- and tetra-peptides of. Optical rotatory dispersion. Part XXXVII, **1449**.
Sesquiterpenoids, studies on. Part XIV, total synthesis of (±)-atractylon, **1866**.
Seven-membered-ring derivatives, studies on. Part V, α-halogenoperhydro-3,8-dimethylazulen-5-one, **2095**.
Sex attractant of the American cockroach, on the structure of, **464**.
Silicon. Organosilicon compounds. Part I, the 2,4,6-trimethyl-2,4,6-triphenylcyclotrisiloxanes and the 2,4,6,8-tetramethyl-2,4,6,8-tetraphenylcyclotetrasiloxanes, **149**.
Organosilicon compounds. Part XXXVII, optical resolution of *p*-(ethylmethylphenylsilyl)benzoic acid, **1524**.
Preparation and properties of polysilmethylenes: use of various compounds of Group VIII metals as catalysts, **1137**.
Synthesis of a silicon-containing analogue of chloramphenicol, **249**.
Synthesis of trimethylsilylphenethylamines, **379**.
5-(*p*-Trimethylsilylbenzyl)pyrimidines, **493**.
Simiarenol, structure of the triterpene (an E:B-*friedo*-hop-5-ene) from the Hong Kong species of *Rhododendron simiarum*, **1251**.
Solorinic acid and norsolorinic acid. Naturally occurring quinones. Part VIII, **1727**.
Sonchus, terpenoids of. Part III, sesquiterpene lactones of *S. Jacquini* D.C., *S. pinnatus* Ait, and *S. radicatus* Ait, **1298**.
Spectra. Infrared spectra of hindered 4(1*H*)-quinolones, **2311**.
Mass spectra and nuclear magnetic resonance of nitrosobenzene derivatives, **1334**.
high-resolution, of bisbenzyltetrahydroisoquinoline alkaloids. The structure of hayatin, **1966**.
of aporphine alkaloids, steric effects in, **2181**.
of bisbenzylisoquinoline alkaloids. The structure of rodiasine. Alkaloids from Greenheart. Part III, **1082**.
of organic compounds, aspects of. Part I, some coumarins and pyronocoumarins, **1712**.
of ψ-pelletierine, 9-methyl-3-oxagranatan-7-one, and 9-methyl-3-oxagranatan-7α-ol, **1207**.
Some novel eliminations of neutral fragments from ions in mass spectrometry. Part I, alkyl and aryl sulphonylhydrazones, **358**. Part III, fragmentation of the 1,3-diphenylpropene ion-radical, **1955**.
Nuclear magnetic resonance and mass spectra of nitrosobenzene derivatives, **1334**.
of sarverogenin acetate, **790**.
solvent shifts of methyl groups in alicyclic ketones: pyrrole and other aromatic solvents, **1613**.
A correlation of the spectra of some meliacins and their derivatives, **1794**.
Proton magnetic resonance parameters of the muconic esters and mucononitriles. Polyene acids. Part IX, **387**.
Proton magnetic resonance spectrum of dimethyl micro-

Spectra (*contd.*)
coccinate, and the probable mode of biosynthesis of micrococcinic acid. Chemistry of micrococcin *P*. Part X, 1371.
Some reactions of dieldrin and the proton magnetic resonance spectra of the products, 2026.
Some reactions of dimethoxynaphthalenes. Part II, the orientation of naphthalene derivatives by nuclear magnetic resonance spectrometry, 904.
The synthesis and proton magnetic resonance spectra of 2,3-dihydro-1,4-benzoxazepin-5(4*H*)-ones, 969.
Ultraviolet absorption of bromobenzo[*c*]cinnolines and their oxides. Polycyclic cinnoline derivatives. Part XVII, 1306.
Spheroidene, spheroidenone, chloroxanthin, and spirilloxanthin, structural and synthetic studies on. Carotenoids and related compounds. Part XVI, 2166.
Spinochrome E, synthesis of. Naturally occurring quinones. Part VII, 426.
Spirilloxanthin, chloroxanthin, spheroidene, and spheroidenone, structural and synthetic studies on. Carotenoids and related compounds. Part XVI, 2166.
Sporidesmins. Part VI. Isolation and structure of dehydrogliotoxin, a metabolite of *Penicillium terlikowskii*, 1799. Part VII, oxindoles derived from sporidesmin-B, 1803.
Stachene, kaurene, isoatisirene, and trachylobane. The acid-catalysed rearrangement of diterpene hydrocarbons. Part I, 2319.
Stebisimine, the structure of, and the biosynthesis of epistephanine. Phenol oxidation and biosynthesis. Part XI, 2313.
Stereochemistry, aspects of. Part XXIII, configuration of some 2,4-disubstituted derivatives of 1,3-dioxolan, 208. Part XXIV, the acid-catalysed rearrangement of 2,4-*O*-benzylidene-D-erythrose and 2,3-*O*-benzylidene-erythritol, 212.
Sterigmatocystin, dihydro-, synthesis of a racemic form of a laevorotatory degradation product, (±)-tetrahydro-4-hydroxy-6-methoxyfuro[2,3-*b*]benzofuran. Studies in mycological chemistry. Part XX, 1308.
Steroid amines. Part I, 17β-aminoandrostane derivatives, 1688. Part II, 17α-aminoandrostane derivatives, 1698. Part III, 3-aminoandrostane derivatives, 1983.
hormones. Part XVI, some organometallic and 3-deoxysteroids, 54. Part XVIII, some derivatives of hexœstrol [3,4-di-(*p*-hydroxyphenyl)hexane], 1213.
compounds related to. Part XVII, an improved method of preparation of 21-acetoxy-17-hydroxy-16β-methyl-5α-pregn-9-ene-3,20-dione, 2201. Part XVIII, reaction of 16α,17α-epoxy-16β-methyl-5α-pregnan-20-ones with boron trifluoride, 2210.
Steroids. Part XXVII, modification of the 14α-methyl group in 4,4,14α-trimethylsteroids, 2359.
and Walden inversion. Part LVIII, the deamination of 3β- and 3α-amino-5α-cholestane, 1018. Part LIX, reactions of some steroid α-hydroxyamines, 1023.
containing ring A aromatic. Part XI, mechanism of the dienol–benzene rearrangement, 1034.
structure and biological activity of. Part I, the hydrogen-bonding properties of halogenohydrins in the t-butylcyclohexane and steroid series, 1902.
amino-. Part I, 16-piperidino- and 16-morpholino-androstanes and -œstra-1,3,5(10)-trienes, 484.
aza-. Part III, approaches to 9-aza-steroids, 760.
1-cyano-, preparation and reactions of some, 661.
4,4-dimethyl-, the acid-catalysed rearrangements of the 5α,6α-diols and 5,6-epoxides of some. The chemistry of triterpenes and related compounds. Part XLV, 1374.
4,4-dimethyl-3-oxo-, oxidation of, with sodium dichromate, 1443.
hydroxy-. Part IV, the preparation and spectra of steroid olefins, 1266. Part V, oxidation of 2-hydroxymethylene-4,4-dimethyl-3-ketones with alkaline peroxide, 1277. Part VI, reactions of olefins with silver salts and iodine, 1327. Part VII, the preparation and reactions of 3α-iodo-5α-cholestan-2β-yl trifluoroacetate, 1331. Part VIII, the conformations and infrared spectra of 3,5-diols and 3,5,6-triols, 1864.
Acid-catalysed reactions of 5α-hydroxy-steroids. Part IV, a new route to 3α, 5α-acetonium ion perchlorates, 576.
Buxus alkaloids. Part VII, the isolation and the constitutions of ten new alkaloids from the weak-base fractions of two species, *B. microphylla* Sieb. *et* Zucc. *var. suffruticosa* Makino and *B. microphylla* Sieb. *et* Zucc. *var. suffruticosa* Makino *forma major* Makino, 1412. Part VIII, the isolation and constitution of a new alkaloid, cyclokoreanine-*B*, from *B. koreana* Nakai, and the conversion of cyclomikuranine into cyclovirobuxine-*A*, 1805.
Conformational free energy differences in. Part I, equilibration of 3β-substituted 5α- and 5β-cholestan-6-ones, 846.
Constituents of the leaves of *Ficus carica* L. Part II, isolation of a ψ-taraxasteryl ester, rutin, and a new steroid sapogenin, 1140.
Constituents of *Withania somnifera* Dun. Part VI, the stereochemistry of withaferin A, 1753. Part VII, rearrangements in withaferin A, 1757. Part VIII, a new steroidal lactone, 27-deoxy-14-hydroxywithaferin A, 1765.
Synthesis of a medium-size ring *via* alkoxy-radical decomposition, 937.
The hydroxylation of cholest-4-en-7β-ol, 1012.
The nuclear magnetic resonance spectrum of sarverogenin acetate, 790.
The structure of the steroidal bromosapogenins, 288.
The Westphalen-type rearrangement of 5α-hydroxycholestane-4,7-diyl diacetate, 1010.
Thermal rearrangement and other reactions of 3β-acetoxy-5α-chlorocholestan-6β-yl nitrate, 2261.
***Sticta billardierii* Del.,** isolation and structural elucidation of 7β-acetoxy-22-hydroxyhopane from. Lichens and fungi. Part II, 1556. Structural elucidation of 15α,22-dihydroxyhopane from. Lichens and fungi. Part III, 1564.
Stilbazoles, the photocyclisation of, to azaphenanthrenes. Studies in photochemistry. Part II, 1078.
***trans*-Stilbenes,** 2-(2-dialkylaminoethoxy)methyl-, 668.
Stobbe condensation of *o*- and *p*-chlorobenzophenone with succinic esters. γγ-Disubstituted itaconic acids. Part III, 603.
Sugars, branched-chain. Part VI, the reaction of methyl 3,4-*O*-isopropylidene-β-L-*erythro*-pentopyranosidulose with organolithium reagents, 303. Part VII, the synthesis of D-mycarose and D-cladinose, 398.
Sulochrin, mutation and radioactive tracer studies relating to biosynthesis of. The biosynthesis of phenols, Part X, 168.

Sulphinylhydrazides, reaction with aromatic aldehydes, and the geometrical isomerism of acylhydrazones, 283.
Sulphinyl oxygen, neighbouring-group participation by. Part I, norbornene sulphoxides, 1585.
Sulphonyldiacetyl chloride, $SO_2(CH_2{\cdot}COCl)_2$, synthesis of, 968.
Sulphonhydrazides and related compounds. Part VI, some halogeno- and nitro-benzenesulphonhydrazides, 1229.
Sulphonylhydrazones, alkyl and aryl. Some novel eliminations of neutral fragments from ions in mass spectrometry. Part I, 358.
Sulphur monochloride, action on *o*-nitroanilines and *o*-phenylenediamines: the formation of 2,1,3-benzothiadiazoles, 1283.
perfluoroalkyl derivatives of. Part VIII, synthesis and reactions of perfluoroethylenesulphonyl fluoride, 1171.
Organophosphorus compounds of sulphur and selenium. Part XXXV, oxophosphoranesulphenamides. Reactions of dialkylaminosulphenyl chlorides with dialkyl and trialkyl phosphites, 2249.
Preparation of 1,1-dialkyldithiobiurets, 2069.
Synthesis of *N*-monosubstituted *S*-aminoethyl hydrogen thiosulphates with sulphone substituents, 645.
The reductive fission of methyl sulphides, 1,3-dithiolans, and a 1,3-oxathiolan by sodium in liquid ammonia, 415.
Sydnones, 3-aryl-, halogen-substituted. Syntheses of heterocyclic compounds. Part XII, 189.
***Symphonia globulifera* L.,** isolation and structure of four polyhydroxyxanthones in. Extractives from Guttiferae, Part II, 430.
Symphoxanthone and globuxanthone, from *Symphonia globulifera* L., the isolation and structure of. Extractives from Guttiferae. Part III, 2186.

T

***Tagetes minuta* L.,** 5-(4-chloro-3-hydroxybut-1-ynyl)-2,2′-bithienyl from. Naturally occurring thiophens. Part II, 1101.
L-Talofuranose, 5-acetamido-5,6-dideoxy-, and 4-acetamido-4,5-dideoxy-D-xylofuranose, syntheses of, 1724.
Tasmanone, the biosynthesis of, 1337.
Taxine. Part III, a revised structure for the neutral fragment from *O*-cinnamoyltaxicin-I, 1932. Part IV, the constitution of taxine-I, 1933.
Terpenes, studies in the synthesis of. Part IX, the reactions of formaldehyde and acetaldehyde with ethyl cyclohexanone-2-glyoxylate, 397.
the chemistry of. Part I, hydrogenation of the pinenes and the carenes, 41. Part II, the physical properties of some *cis–trans* substituted cyclohexanes, 946.
Carotenoids and related compounds. Stereochemistry and synthesis of geraniol, nerol, farnesol, and phytol, 2144. Part XV, synthesis of phytoene, phytofluene, ζ-carotene, and neurosporene, 2154. Part XVI, structural and synthetic studies on spirriloxanthin, chloroxanthin, spheroidene, and spheroidenone, 2166.
Constituents of *Erythroxylon monogynum* Roxb. Part II, erythroxydiols X, Y, and Z; two novel skeletal types of diterpenoids, 268.
Fungal metabolites. Part VII, stereochemistry of gibberellic acid: *X*-ray analysis of methyl bromogibberellate, 1577.
Lichens and fungi. Part II, isolation and structural elucidation of 7β-acetoxy-22-hydroxyhopane from *Sticta billardierii* Del., 1556. Part III, structural elucidation of 15α,22-dihydroxyhopane from *S. billardierii* Del., 1564.
Nuclear magnetic resonance spectroscopy. A correlation of the spectra of some meliacins and their derivatives, 1794.
Sesquiterpenoids. Part V, the stereochemistry of acorone: *X*-ray analysis of acorone *p*-bromophenylsulphonylhydrazone, 579.
Studies on sesquiterpenoids. Part XIII, components of the root of *Ligularia Fischeri* Turcz., 1545. Part XIV, total synthesis of (±)-atractylon, 1866.
Syntheses of the *trans,meso-* and racemic C_{11} acids, degradation products of diterpene acids, 1458.
Taxine. Part III, a revised structure for the neutral fragment from *O*-cinnamoyltaxicin-I, 1932. Part IV, the constitution of taxine-I, 1933.
The acid-catalysed rearrangement of diterpene hydrocarbons. Part I, kaurene, isoatisirene, stachene, and trachylobane, 2319.
The chemistry of triterpenes and related compounds. Part XLV, the acid-catalysed rearrangements of the 5α,6α-diols and 5,6-epoxides of some 4,4-dimethylsteroids, 1374.
The constitution and stereochemistry of rimuene, 273.
The epoxidation of *p*-menth-1- and -3-ene, 612.
The preparation and rearrangement of γ-terpineol epoxides, 1296.
The stereochemistry of the Colombo root bitter principles, 1482.
The structure of rimuene, 1737.
The structure of the triterpene simiarenol (an E:B-*friedo*-hop-5-ene) from the Hong Kong species of *Rhododendron simiarum*, 1251.
The synthesis of (−)-sandaracopimaradiene from androstane derivatives, 1847.
Terpenoids of the Sonchus. Part III, sesquiterpene lactones of *S. Jacquini* D.C., *S. pinnatus* Ait, and *S. radicatus* Ait, 1298.
Tetralin, 6-hydroxy-7-methoxy-2β,3α-dimethyl-4β-(3,4-methylenedioxyphenyl)-, otobaphenol, 1775.
1-Tetralone oxime, 2-nitro-, rearrangement with polyphosphoric acid. Studies on the syntheses of heterocyclic compounds. Part CXXXVI, 717.
Thiamine, the role of the pyrimidine 4-amino-group in, 649.
1,4-Thiazepines and **1,4-thioxans** from thiols, 1708.
Thiazole-4-carboxylic acids, a method for the degradation of. Chemistry of micrococcin *P*. Part VIII, 1357.
Thiazolidine, 2-imino-, precursors of 2,3,6,7-tetrahydroimidazo[2,1-*b*]thiazolium bromide, 1226.
Thiazolines derived from cysteine, dehydrogenation of some. Peptides. Part XXI, 1061.
Thienopyrazoles, 1-phenylindazole and derivatives, and pyridylindazoles, the synthesis of. Reactions of lead tetra-acetate. Part V, 1527.
Thiins, and pyrans, triphenyl- and tetraphenyl-cyclopentadienylidene-, 1086.
Thiocarbamic acid, derivatives of. Part I, preparation of 4-substituted thiosemicarbazides, 950. Part II, the formation of 1,2,4-triazole salts from amines and methyl dithiocarbazate. Some attempts to prepare substituted 1-thiocarbamoylthiocarbohydrazides, 1256.

Thiols, addition to 5,6-dimethylenenorborn-2-ene, and its reactivity towards thiol addition relative to the reactivity of other bridged polycyclic olefins, 1045.
ethane- and methane-, addition to hexachloronorbornadiene, 1540.
Thiophen derivatives. Part XV, 3- and 4-hydroxythianaphthen in the synthesis of some thia-derivatives of polycyclic carcinogens, 47.
Thiophens, naturally occurring. Part II, 5-(4-chloro-3-hydroxybut-1-ynyl)-2,2′-bithienyl from *Tagetes minuta* L., 1101.
Thiostrepton, experiments on the oxidation of. Peptides. Part XXIII, 2115.
Thio-sugars. Part I, the thiopyranose ring, 1287. Part II, the thiofuranose ring, 1291.
Thymine, 1-methyl- and 3-methyl-, the photochemistry of, 1342.
photo-dimer, the structure of, 2239.
Timbers, East Africa, extractives from. Part III, the identification of volatile acids from complex natural esters, 949.
Timbers, West African. Part XII, the inter-relation of gedunin and khivorin, 506. Part XIII, extracts from the heartwood of *Amphimas pterocarpoides* and *Pterocarpus erinaceous*, 509. Part XVII, correlation of gedunin, methyl angolensate, and andirobin, 944. Part XVIII, some reactions of *Cedrela odorata* substance "B" and khayasin, 2127.
Tin. Organometallic reactions. Part IV, the preparation of bistrialkyltin derivatives of ureas and biurets by the decarboxylation of bistrialkyltin oxide–isocyanate adducts, 299. Part V, trialkylstannylation of amides, 1311.
Tocopherols, bond stabilisation in. Part I, the Claisen rearrangement of allyl tocopheryl ethers, 1422. Part II, Claisen rearrangement of but-2-enyl tocopheryl ethers, 1427. Part III, structure of nitrosotocopherols and conversion into quinones, 1431.
***o*-Toluic acid,** α-phenyl-, nitration of, 218.
Trachylobane, kaurene, isoatisirene, and stachene. The acid-catalysed rearrangement of diterpene hydrocarbons, 2319.
αα-Trehalose, chemical transformations of, 1072.
Triazaphenanthrenes. Part VI, further observations on the Widman–Stoermer and Borsche reactions, 2053.
1,2,3-Triazole, 4-formyl-2-phenyl-, and osotriazoles, derivatives of, 91.
1,2,4-Triazole salts, formation of, from amines and methyl dithiocarbazate. Some attempts to prepare 1-thiocarbamoylthiocarbohydrazides. Derivatives of thiocarbamic acid. Part II, 1256.
***s*-Triazolopyrazines,** 2038.
***s*-Triazolopyrimidines.** Part IV, synthesis as potential therapeutic agents, 2031.
1,2,3-Triazolo[1,5-*a*]quinazoline ring system, the structure and reactivity of. The chemistry of polyazaheterocyclic compounds. Part I, 2290.
(Tricyclo[5,2,1,$0^{2,6}$]deca-3,8-diene), perfluoro-; the thermal dimer of perfluorocyclopentadiene. Polyfluorocyclopentadienes. Part II, 2102.
Tropanes, conformations of, 74.
Tropolones, photochemical transformations of. Part II, 4′,5′-dimethoxy-5,6-benztropolone methyl ether and its photo-oxidation, 2072.
Tropylphenols, reactions of some. Novel aromatic systems. Part II, 926.
Tryptamines, 2-alkyl-, and 3,4-dihydro-β-carboline, a synthesis of, 425.

U

Ugaxanthone and mbarraxanthone from *Symphonia globulifera* L., isolation and structure of, 2265.
Urea, dihydroxy-, synthesis and some reactions of, 350.
Ureas. Heterocyclic compounds from urea derivatives. Part IX, addition products of diaminoguanidine and isothiocyanate esters, and their cyclisation. Part X, addition products of isocyanate esters and diaminoguanidine or its hydrazones, and their cyclisation, 1,6.
Urobilins, effect of metal complex formation upon optical activity and spectral absorption of. The chemistry of the bile pigments. Part VI, 1321.
Uronic acid materials, studies on. Part XVII, some structural features of *Acacia senegal* gum (gum Arabic), 1959. Part XII, the composition of *Acacia* gum exudates, 762.

V

Veratrole, 3-toluene-*p*-sulphonamido-, nitration and bromination of, 375.
Verrucarin A, the structure of: *X*-ray analysis of verrucarin A *p*-iodobenzenesulphonate. Fungal metabolites. Part VI, 1394.
Viridin. Part III, the structure of a tetracyclic C_{17} product of oxidation with hydrogen peroxide, 725. Part IV, total synthesis of a tetracyclic C_{18} degradation product, 734. Part V, structure, 743.
Vitamin A aldehyde–tricarbonyliron adduct, 2060.

W

Westphalen-type rearrangement of 5α-hydroxycholestane-4,7-diyl diacetate, 1010.
Withaferin A, the stereochemistry of. Constituents of *Withania somnifera* Dun. Part VI, 1753.
rearrangements in. Constituents of *Withania somnifera* Dun. Part VII, 1757.
27-deoxy-14-hydroxy-, a new steroidal lactone. Constituents of *Withania somnifera* Dun. Part VIII, 1765.
Wittig olefin synthesis, mechanism of, 1090.
Woods. The chemistry of the "insoluble red" woods. Part X, syntheses of isoflavans, isoflav-3-enes, and isoflavylium salts, 629.

X

Xanthone series, studies in. Part VIII, an unambiguous synthesis of jacareubin, 175.
Xanthones, the nuclear magnetic resonance spectra of; mangiferin. *C*-Glycosyl compounds. Part V, 1685.
polyhydroxy-, isolation and structure of four in *Symphonia globulifera* L. Extractives from Guttiferae. Part II, 430.
(±)-Xanthorrhoein, synthesis of, 523.
D-Xylofuranose, 4-acetamido-4,5-dideoxy-, and 5-acetamido-5,6-dideoxy-L-talofuranose, syntheses of, 1724.

Z

Zeatin, synthesis of, a naturally occurring adenine derivative with plant cell-division-promoting activity, and its 9-β-D-ribofuranoside. Purines, pyrimidines, and imidazoles. Part XXIV, 921.

Richard Clay (The Chaucer Press), Ltd.,
Bungay, Suffolk

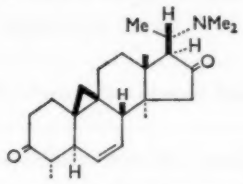
ERRATA prior to 1 January 1966

Vol. 1948, page 239, line 10*. *For* m. p. 223—224°, $[\alpha]_D^{18}$ −16·4° *read* m. p. 223—224°, $[\alpha]_D^{18}$ +16·4°.

Vol. 1965, page 4513, Table, line 3*. *For* *N*-methyl groups at C-3 and C-20 *read* *N*-methyl groups at C-20 and C-3.

Vol. 1965, page 4521. Formula (XXX) should be shown as

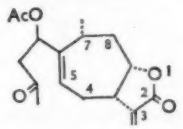


Vol. 1965, page 6548, line 23. *For* 72% of 4-hydroxycyclohexyl phosphate and, *read* 72% of cyclohexane diphosphate and

---

Vol. 1965, page 6777, Paper 1255, Title line 2. *For* Synthesis of Poly-β-L- and, *read* Synthesis of Poly-γ-L- and.

Vol. 1965, page 7009. Formula (II) should be shown as



Vol. 1965, page 7174, Table 5, compound 36. *For* $C_{13}H_{18}ClN_3$ *read* $C_{13}H_{19}ClN_2$.

Vol. 1965, page 7180, Table footnote* line 3. (*a*) A neutral by-product was indol-3-ylacetald oxime (VI), *delete* (VI).

Vol. 1965, page 7425, Summary line 4. *For* a 3,4-cyclic product *read* a 2,4-cyclic product.

---

* From foot of main text.

ERRATA. Section C

1966, page 37, left hand column, lines 6 and 7. *For* 5,5′-Diacetyl-4,4′-diethyl-3,3′-dimethylpyrromethane *read* 5,5′-Diacetyl-3,3′-diethyl-4,4′-dimethylpyrromethane.

1966, page 88, Table. *For* 9-Trifluoromethyl-10-methyl *read* 12-Methyl-9-trifluoromethyl.

1966, page 436, left hand column, line 10. *For* 10 ml. *read* 100 ml.

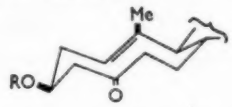
1966, page 448, right hand column, line 18*. For *Benzylation of* read *Benzoylation of*.

1966, page 543, footnote*. *For* has reported that munduserone has *read* has reported that millettone has.

1966, page 755, right hand column, line 11. *For* (±)-glaucine(VIII) *read* (±)-glaucine(VII).

1966, page 770, right hand column, line 17*. *For* CH with CO_2H diffuse *read* OH with CO_2H diffuse.

1966, page 939. Formulæ (II and III) should be shown as



1966, page 940, Table 3. *For* Cholestane-3β,5β-diol *read* Cholestane-3β,5α-diol. *For* Cholestan-β-ol *read* Cholestan-3β-ol.

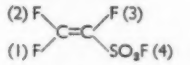
1966, page 1019, Table 2, last line of figures. *For* 45 45 0 54 2 *read* 45 100 0 54 2.

1966, page 1050. *Insert* before acknowledgements

Note added in proof. Since this paper was prepared E. S. Huyser and R. M. Kellogg (*J. Org. Chem.*, 1965, 30, 3003) have reported that the reactivity ratio of norbornene with respect to methylenenorbornene toward free-radical addition of ethanethiol varies with both the ethanethiol concentration and temperature.

1966, page 1171 *et seq.* *Insert.* A correction:–

" The 56·46 Mc./sec. ^{19}F n.m.r. spectrum of perfluoroethylenesulphonyl fluoride, measured relative to external trifluoroacetic acid and as a 60% v/v solution in carbon tetrachloride, has been re-examined by Dr. M. G. Barlow of this Department, and the correct parameters are given below.



$\delta_1 = +13{\cdot}0$; $\delta_2 = +2{\cdot}1$; $\delta_3 = 103{\cdot}2$; $\delta_4 = -141{\cdot}8$ p.p.m.
$|J_{12}| = 15{\cdot}3$; $|J_{13}| = 121{\cdot}5$; $|J_{14}| = 3{\cdot}7$; $|J_{23}| = 42{\cdot}4$; $|J_{24}| = 13{\cdot}5$; $|J_{34}| = 5{\cdot}1$ c./sec."

1966, page 1073, right hand column, line 5. *For* $C_{23}H_{38}O_{13}$ *read* $C_{24}H_{38}O_{13}$.

1966, page 1074, left hand column, line 9. *For* $C_{20}H_3O_{19}S_4$ *read* $C_{20}H_{34}O_{19}S_4$. Line 3*. *For* $C_2H_3O_{15}$ *read* $C_{24}H_{24}O_{15}$. Right hand column, line 18. *For* $C_{12}H_{24}O_{10},H_2O$ *read* $C_{12}H_{22}O_9,H_2O$.

---

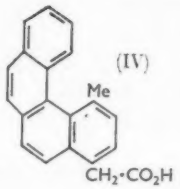
* From foot of main text.

Errata

1966, page 1221, left hand column, line 8*. *For* madelic acid *read* mandelic acid.

1966, page 1222, right hand column, line 17. For *methoxymadelic acid* read *methoxymandelic acid.*

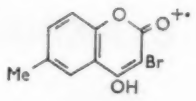
1966, page 1316. Formula (IV) should be shown as:



(IV)

1966, page 1714, left hand column, line 7. *For* ion at *m/e* 189 *read* ion at *m/e* 190.

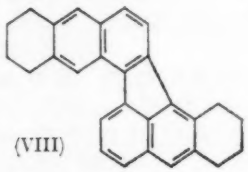
1966, page 1715. Formula (V) should be shown as:



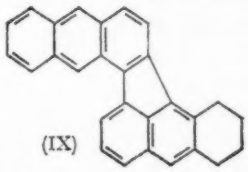
1966, page 2053, reference 1. *For* 1956 *read* 1946.

1966, page 2253. A correction:–

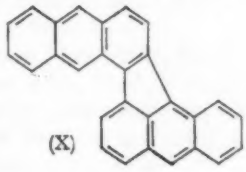
" Further work has shown that compounds (VIII), (IX), and (X) should have the following structures and names:



(VIII)



(IX)



(X)

(VIII) 1,2,3,4,10,11,12,13-Octahydroanthro[2,1-*a*]aceanthrylene,
(IX) 1,2,3,4-Tetrahydroanthro[2,1-*a*] aceanthrylene,
(X) Anthro[2,1-*a*]aceanthrylene."
